

News Release

100% Fiber Network Powered by AT&T Fiber Expands to Bartlett

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Bartlett

BARTLETT, TN., March 23, 2017 —AT&T¹ is now offering a 1 gigabit connection² on our 100% fiber network powered by AT&T FiberSM to customer locations in the Memphis area, including in parts of Bartlett and surrounding areas.³

Our fastest internet speed, AT&T Internet 1000, is now available to homes, apartments and small businesses in the Memphis area, including at nearly 50 multifamily area properties.

The Memphis area is one of 51 metros nationwide where our ultra-fast internet service is currently available. We plan to reach at least 67 metros with our fastest internet service.

We market our ultra-fast service to nearly 4 million customer locations, of which over 650,000 include apartments and condo units. We plan to reach 12.5 million locations by mid-2019.

“I am excited by this announcement, which is yet another example of private industry responding to consumer demand,” said John Threadgill, CEO, Bartlett Chamber of Commerce. “High-speed internet can open new doors for the citizens of Bartlett and positively impact many aspects of life, such as education and job attraction.”

“It’s encouraging to see private investment filling the demand for high-speed broadband in in and around Memphis,” said Rep. Jim Coley. “My colleagues and I are striving to create policies that foster free markets and I think this is a great example of those polices paying off.”

“While businesses have had access to 100% fiber networks for some time here in Bartlett, the expansion of these services that provide gigabit connectivity in residential areas is a game changer for our citizens,” said Rep. Ron Lollar.

“A robust communications network plays a key role in Bartlett’s economic future, and through private investments like this one, our economy grows stronger and creates opportunity for families throughout the region,” said Mayor Keith McDonald.

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$80 a month with a 12-month commitment.⁴

Customers may be able to add one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer's needs.

"Our customers are increasingly interacting with their world in more data-intensive ways," said Chuck Thomas, regional director, external affairs, AT&T Tennessee. "A growing number of people are streaming content directly from their devices, and interacting with family and friends through live videos. For these reasons, we're continuing to expand the availability of our fastest internet speeds to more Memphis area communities."

Internet customers on the 100% fiber network have access to our latest Wi-Fi technology. They can enjoy our best in-home experience with faster Wi-Fi speeds and broad coverage to seamlessly connect all their devices.

What can I do with a service that starts with a 1 gig connection?

These internet speeds are 20x faster than the average cable customer.⁵ You can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁶ Customers can enjoy our fastest upload and download speeds.

You can also quickly access and stream the latest online movies, music and games. These ultra-fast speeds let you easily telecommute, video-conference, upload and download photos and videos, and connect faster to the cloud.

What is AT&T Fiber?

The 100% fiber network under the AT&T Fiber umbrella brand lets customers choose from a range of internet speeds, all over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.

Frost & Sullivan recently recognized AT&T for its leadership in high-speed internet services. It awarded AT&T the 2016 Company of the Year Award for Broadband Access. The analyst firm praised AT&T for "rapidly evolving into a new form of telecommunications company; one that is based on the delivery of broadband access, both fixed and mobile, as well as services that ride that access."

AT&T in Tennessee:

We've invested nearly \$200 million in our Memphis area wireless and wired networks from 2013 -2015. AT&T has invested nearly \$1.15 billion in its wireless and wireline networks in Tennessee between 2013 through 2015. This drives upgrades to reliability, coverage, speed and performance for residents and business customers.

¹ AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand name and not by AT&T Inc.

² Actual customer speeds may vary. Download speeds are typically up to 940Mbps due to overhead capacity reserved to deliver the data.

³ Initial availability limited to select areas. May not be available in your area. Go to att.com/fibermap to see if you qualify.

⁴ After 12 months, price moves to standard rate of \$119/mo.

⁵ Available in select areas. 20x faster based on maximum download speed of AT&T Internet 1000 vs weighted average cable internet customers' speed of major U.S. cable providers per the FCC 2015 Measuring Broadband America – Fixed Broadband Report. Actual speeds vary.

⁶ Speed/Time examples are estimates.
