

News Release

100% Fiber Network Powered by AT&T Fiber Expands in Sacramento Area

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Additional Sacramento Area Cities

SACRAMENTO, Dec. 13, 2016 —AT&T¹ is now offering a 1 gigabit connection² on our 100% fiber network powered by AT&T FiberSM to customer locations in the Sacramento area, including in parts of Modesto, Rancho Cordova, Sacramento, Stockton, West Sacramento and surrounding areas.³

In addition to the homes and small businesses connected to our 100% fiber network in the Sacramento area, we connect more than 30 area apartment and condo properties.

We previously announced ultra-fast internet speeds available in parts of Placer County (Roseville, Rocklin, Lincoln), and their surrounding communities. We plan to expand access to ultra-fast internet speeds in parts of Fairfield, Tracy and Vacaville in the future.

The Sacramento area is one of 46 metros nationwide where our ultra-fast internet service is currently available. We plan to reach at least 67 metros with our fastest internet service.

We market our ultra-fast service to over 3 million locations nationwide, of which over 500,000 include apartments and condo units. We're on track to meet the 12.5 million locations planned by mid-2019.

"Ultra-fast internet powered by AT&T Fiber will meet the demand of consumers and small businesses as they access more content from more devices, in the greater Sacramento area," according to Tim Ray, Regional VP, External Affairs. "This greatly improves download speeds and streaming quality for customers connected to the cloud, enjoying videos and music, hosting a videoconference, playing online games and more."

"The launch of ultra-fast fiber internet by AT&T is already accelerating demand for living in our up-and-coming riverfront districts and other new neighborhoods, and spurring entrepreneurs and companies to innovate right here in the region's urban core," said West Sacramento Mayor Christopher Cabaldon. "As one of the fastest-growing communities and innovation hubs in Northern California, West Sacramento applauds the coming of AT&T's 100% fiber network to our homes, apartments, and small businesses."

“The 100% fiber network from AT&T will contribute to our growing economy and high quality of life in the Sacramento Region,” said CSU Sacramento President Robert Nelsen. “Access to high-speed internet will help create new jobs, grow small businesses and improve access to educational opportunities.”

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$90 a month. Customers may be able to add one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer’s needs.

Internet customers on the 100% fiber network have access to the latest Wi-Fi technology. They can enjoy our best in-home experience with faster Wi-Fi speeds and broad coverage to seamlessly connect all their devices.

What can I do with a service that starts with a 1 gig connection?

These internet speeds are 20x faster than the average cable customer.⁴ You can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁵ Customers can enjoy our fastest upload and download speeds.

You can also instantly access and stream the latest online movies, music and games. These ultra-fast speeds let you seamlessly telecommute, video-conference, upload and download photos and videos, and connect faster to the cloud.

What is AT&T Fiber?

The 100% fiber network under the AT&T Fiber umbrella brand lets customers choose from a wide range of internet speeds, all over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.

Frost & Sullivan recently recognized AT&T for its leadership in high-speed internet services. It awarded AT&T the 2016 Company of the Year Award for Broadband Access. The analyst firm praised AT&T for “rapidly evolving into a new form of telecommunications company; one that is based on the delivery of broadband access, both fixed and mobile, as well as services that ride that access.”
