

## News Release

### **100% Fiber Network Powered by AT&T Fiber Expands in Greater Sacramento Area**

*Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Additional Sacramento Area Cities*

**SACRAMENTO, March, 23, 2017** —AT&T<sup>1</sup> is now offering a 1 gigabit connection<sup>2</sup> on our 100% fiber network powered by AT&T Fiber<sup>SM</sup> to more customer locations in the Greater Sacramento area, including in parts of Fairfield, Turlock, Vacaville and surrounding areas.<sup>3</sup>

Our fastest internet speed, AT&T Internet 1000, is now available to homes, apartments and small businesses in the Sacramento area, including at nearly 40 multifamily area properties.

We previously announced ultra-fast internet speeds available in parts of Lincoln, Modesto, Rancho Cordova, Roseville, Rocklin, Sacramento, Stockton, West Sacramento, and their surrounding communities. We plan to expand access to ultra-fast internet speeds in parts of Davis and Tracy in the future.

The Sacramento area is one of 51 metros nationwide where our ultra-fast internet service is currently available. We plan to reach at least 67 metros with our fastest internet service.

We market our ultra-fast service to nearly 4 million customer locations, of which over 650,000 include apartments and condo units. We plan to reach 12.5 million locations by mid-2019.

“A growing number of our customers are streaming content directly from their devices, and interacting with family and friends through live videos and via internet connections,” said Tim Ray, AVP External Affairs, AT&T California. “For these reasons, we’re continuing to expand the availability of our fastest internet speeds to the Sacramento metro area. Residents, visitors, and businesses will be able to take advantage of AT&T’s fastest speeds to connect better with the people who matter most.”

“Our region has a great diversity of stakeholders from small business, agriculture and leading technology companies,” said Harry Price, Mayor, City of Fairfield. “Our residents want faster internet speeds to take our area into the digital age and provide more job growth. Broadband is critical infrastructure for economic development, education access, and delivery of social services in today’s 21st century economy. We are happy that AT&T will bring more fiber capacity to our Solano communities.”

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$80 a month with a 12-month commitment.<sup>4</sup> Customers may be able to add one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer's needs.

Internet customers on the 100% fiber network have access to our latest Wi-Fi technology. They can enjoy our best in-home experience with faster Wi-Fi speeds and broad coverage to seamlessly connect all their devices.

### **What can I do with a service that starts with a 1 gig connection?**

These internet speeds are 20x faster than the average cable customer.<sup>5</sup> You can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.<sup>6</sup> Customers can enjoy our fastest upload and download speeds.

You can also quickly access and stream the latest online movies, music and games. These ultra-fast speeds let you easily telecommute, video-conference, upload and download photos and videos, and connect faster to the cloud.

### **What is AT&T Fiber?**

The 100% fiber network under the AT&T Fiber umbrella brand lets customers choose from a range of internet speeds, all over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.

Frost & Sullivan recently recognized AT&T for its leadership in high-speed internet services. It awarded AT&T the 2016 Company of the Year Award for Broadband Access. The analyst firm praised AT&T for "rapidly evolving into a new form of telecommunications company; one that is based on the delivery of broadband access, both fixed and mobile, as well as services that ride that access."

### **AT&T in Sacramento**

AT&T has invested more than \$325 million in its wireless and wireline networks in Sacramento between 2013 through 2015. This drives upgrades to reliability, coverage, speed and performance for residents and business customers.

<sup>1</sup> AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand name and not by AT&T Inc.

<sup>2</sup> Actual customer speeds may vary. Download speeds are typically up to 940Mbps due to overhead capacity reserved to deliver the data.

<sup>3</sup> Initial availability limited to select areas. May not be available in your area. Go to [att.com/fibermap](http://att.com/fibermap) to see if you qualify.

<sup>4</sup> After 12 months, price moves to standard rate of \$119/mo.

<sup>5</sup>Available in select areas. 20x faster based on maximum download speed of AT&T Internet 1000 vs weighted average cable internet customers' speed of major U.S. cable providers per the FCC 2015 Measuring Broadband America – Fixed Broadband Report. Actual speeds vary.

<sup>6</sup>Speed/Time examples are estimates.

**Cautionary Language Regarding Forward Looking Statements:** Information set forth in this news release contains financial estimates and other forward-looking statements that are subject to risks and uncertainties, and actual results may differ materially. A discussion of factors that may affect future results is contained in AT&T Inc.'s filings with the Securities and Exchange Commission. AT&T disclaims any obligation to update or revise statements contained in this news release based on new information or otherwise.
