LTE-M will be a catalyst for large-scale deployment of the Internet of Things, reaching more end points than ever before with carrier-grade security.

*Image does not represent coverage*

### LTE-M ADVANTAGES

- **Small as 1/6 the size of current modules**
- **Lower device prices**
- **Up to 10 year expected battery life**
- **Better coverage in buildings and underground**
- **Global, 3GPP standardized technology using licensed spectrum**

### NORTH AMERICAN FOOTPRINT COVERING

**400 MILLION PEOPLE BY THE END OF 2017**

**VEHICLE SOLUTIONS**
- Car & truck telematics, fleet, insurance, diagnostics

**WEARABLES**
- Wristbands, smart watches, fitness, health and safety

**SECURITY ALARMS**
- Enterprise, industrial and consumer security alarm systems

**ASSET MANAGEMENT**
- Trucks, containers, real properties

**SMART CITIES**
- Utility meters, street lights, water systems

**RETAIL**
- Credit card readers, vending machines, package delivery

**BROAD BASE OF ECOSYSTEM PARTNERS, DEVICES AND APPLICATIONS FOR GLOBAL MARKETS.**
