

News Release

AT&T Invests Nearly \$80 Million Over 3-Year Period to Boost Local Networks in Idaho

BOISE, Idaho, JULY 1, 2019 — At [AT&T](#)¹, we've invested nearly \$80 million in our Idaho wireless networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've also improved critical services that support Public Safety and first responders using the FirstNet communications platform.

AT&T's wireless network covers more than 99% of all Americans and has become the fastest wireless network in the nation, according to the first quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®.²

AT&T anticipates continued and increased investment in Idaho following the formation of Idaho's first Broadband Task Force by Governor Brad Little. It was created to increase broadband infrastructure and bring connectivity to rural parts of the state.

"The governor's task force indicates that connectivity is of high priority in Idaho," said Tara Thue, president of AT&T Idaho. "This commitment paves the way for Idaho small businesses to increase innovation, Idaho communities to bolster public safety and for our schools to provide even greater opportunities in education."

In 2018, AT&T made 177 wireless network upgrades in Idaho. We added new cell sites, boosted network capacity, and launched 4G LTE in multiple communities.

Notable Idaho network enhancements in 2018 included:

- Boosted coverage for customers at the Capitol by deploying a new antenna system;
- Launched 4G LTE in Clark, Bonneville, Twin Falls, and Lemhi counties.

By building out our 4G LTE network, we're boosting network speeds and capacity, as we continue to expand the availability of our network and upgrade our technology.

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

Transforming Public Safety Communications

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first

responders connect to the critical information they need – every day and in every emergency.

Building upon our current and planned investments in Idaho, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Deployed Band 14 spectrum in more than 600 markets nationwide, including Boise. Band 14 is high-quality spectrum provided by the First Responder Network Authority. Its signal covers larger geographic areas with less infrastructure to better support rural communities, and it can better reach in-building in more urban areas as compared to higher-MHz spectrum.
- Idaho first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network in the nation, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.³
- Public safety agencies subscribed to FirstNet have 24/7 [access](#) to a nationwide fleet of 75 deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.
