

AT&T Windstrong Energy Center Webb and Duval Counties

Overview

- » Located in Webb and Duval counties in Texas
- » Owned and operated by a subsidiary of NextEra Energy Resources, LLC.
- » Expected maximum capacity of approximately 300 megawatts produced by up to 121 GE turbines
- » Each turbine will be 89 meters tall from the ground to the hub in the center of the blades
- » Commercial operation is currently targeted for 2018

Benefits

- » Provides employment opportunities
- » Adds tax base to the counties
- » Delivers landowner lease payments
- » Increased local spending for goods and services during construction
- » Creates no air or water pollution
- » Will avoid more than 888,822 metric tons per year of carbon dioxide emissions that would have been produced if the electricity had been generated using fossil fuels
 - » The equivalent of taking 190,326 cars off the road for a year
- » Uses no water in power generation
- » Allows land to remain in agricultural use
- » Supports economy through purchases of regional goods and services

Projected Local Economic Impact

Construction Jobs:	250
Full-Time Operations Jobs:	10 - 15
Capital Cost:	Approx. \$350 Million
Property Taxes:	Approx. \$60 Million*
Landowner Payments:	Approx. \$60 Million*

**Estimated over first 30 years of the project. All figures are estimated and subject to change.*
