

AT&T Accelerates Deployment of Gigabit Speeds to Businesses in Louisville

1 Gigabit per Second Internet speeds are now available through AT&T Business Fiber

LOUISVILLE, June 21, 2016 — [AT&T](#)¹ is accelerating the deployment of gigabit Internet speeds for businesses through AT&T Business Fiber. More business customers in the Louisville area can now enjoy download and upload speeds up to 1 gigabit per second (Gbps).² AT&T Business Fiber is a blazing-fast Internet service available in [AT&T Fiber Ready](#) buildings.

"The business and residents of Greater Louisville have an insatiable appetite for broadband," said Kent Oyler, President & CEO of GLI and former broadband entrepreneur. "AT&T is investing millions in new fiber-optic infrastructure across our region and expanding the capabilities of its already robust broadband network services."

"In an increasingly competitive market for job attraction, this is the type of incentive that can help Jefferson County contend for the best jobs," said Sen. Julie Raque Adams. "High-speed Internet is quickly becoming the backbone of our economy and news of this private investment is most welcome."

Louisville businesses rely on their ability to stay connected to high-speed Internet, and through this expansion of gigabit service, we can open the door to greater opportunities in our business community," said Sen. Morgan McGarvey.

"For years, we have offered business customers gigabit connections, but through AT&T Business Fiber, we are speeding deployment of these high-speed connections to our business customers, offering fast and reliable network solutions to stay connected and competitive," said Hood Harris, president of AT&T Kentucky. "In the improved regulatory environment in Kentucky, we are investing heavily in our fiber-optics infrastructure, deploying increased speeds to both business and residential consumers across the Commonwealth."

With Internet speeds up to 1Gbps a business can:

- Download 8,000 word processing documents in 1 second
- Download a 2 hour high definition video in 36 seconds
- Backup/restore 1 terabyte hard drive in 2.5 hours

Let's just say, it's FAST!

We're also launching nationwide U-verse Business Voice over AT&T Business Fiber.³ The voice over IP phone service delivers great sound quality and high reliability. Through voice over IP we're delivering voice services over the Internet rather than over a traditional phone line. Customers get many standard calling features, plus enhanced functionality not found on traditional landline phones. These enhancements will help boost productivity. A self-service website helps businesses conveniently manage calling features, call preferences, voicemail and more.

AT&T is investing in high-speed Internet in urban and rural areas using the latest wired and wireless technologies and has aggressively expanded its fiber footprint over the past few years, both to consumers and businesses. We have expanded coverage to reach over 1 million incremental business customer locations in the US with over 11,000 of those in Kentucky. We currently have over 75 multi-tenant office buildings that are live with AT&T Business Fiber in Kentucky. We continue to build out as demand requires. New buildings are constructed, and old buildings are retrofitted every day throughout the country, at a massive scale.

In fact, according to the US Census Bureau, the seasonally adjusted annual value of private, nonresidential construction in the US in 2015 was \$394.4 billion. Our goal is to work with building owners and property managers to strive to satisfy the demand for fiber services of the tenants of that construction.

¹AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand and not by AT&T Inc.

² Geographic and service restrictions apply to AT&T Business Fiber. Acceptance of AT&T High Speed Internet Terms of Service at att.com/internet-terms is required. Internet speed claims represent maximum network Service Capability speeds. Actual customer speeds may vary and are not guaranteed. Actual speeds vary based on factors including site traffic, content provider server capacity, internal network management factors, device capabilities and use of other services.

³ U-verse[®] Voice, including 911 dialing, will not function during a power outage without battery backup power, during a network outage, with relocation of the U-verse Gateway, with delays that may occur in making a registered location available through the ALI Database or with disconnection of service due to billing issues. Refer to U-verse Voice Terms of Service at <http://www.att.com/gen/general?pid=6622> for more information on 911 and alarm systems. Acceptance of U-verse[®] Voice Terms of Service and 911 Acknowledgement required. AT&T U-verse[®] Voicemail may not be fully compatible with all AT&T wireless voice mail systems. Some call information may be blocked or otherwise not displayed, including information for some calls originating outside of AT&T's network and calls carried over facilities that do not transmit Caller ID information. U-verse Voice requires a U-verse High Speed Internet connection and acceptance of U-verse High Speed Internet Terms of Service at <http://www.att.com/internet-terms>.
