

News Release

AT&T Launches Ultra-Fast Internet Speeds in Oklahoma

Speeds up to 1 Gigabit per Second Available on the AT&T GigaPower Network in parts of Edmond, Moore and Norman

Oklahoma City, June 14, 2016 — [AT&T](#)¹ today launched ultra-fast Internet service in parts of Edmond, Moore and Norman.² Customers in the area will be able to get speeds up to 1 gigabit per second³ (Gbps) in homes, apartments and small businesses.

Internet speeds up to 1Gbps over our 100% fiber [AT&T GigaPower](#) network are blazing fast.

- Instantly access the latest online movies, music and games.
- Connect faster to the cloud, videoconferencing and more.
- Download 25 songs in 1 second, a TV show in 3 seconds or your favorite HD movie in less than 36 seconds.⁴

These communities are in addition to the parts of the Oklahoma City area where we launched service earlier this year.

“AT&T has been connecting customers in the Oklahoma City area for more than 130 years and invested billions of dollars in our wired and wireless high-speed Internet networks here and across the country,” said Steve Hahn, president, AT&T Oklahoma. “The pro-investment policies and forward-looking actions of our local leaders help make it possible. We are excited to offer speeds up to 1Gbps to more parts of Oklahoma, and we can’t wait to see what Oklahomans do with those speeds.”

[AT&T GigaPower](#)

AT&T GigaPower offers internet speeds up to 1Gbps for as low as \$90 a month.⁵

AT&T GigaPower customers have access to the latest Wi-Fi technology. They can enjoy our best in-home Wi-Fi experience, faster Wi-Fi speeds, expanded coverage and support for all of their devices.

Customers may be able to choose between our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer’s needs.

The AT&T GigaPower network is currently available in over 1.6 million locations across 25 of the nation’s largest metro areas. We have plans to expand the availability of ultra-fast internet speeds up to 1 gigabit per second in parts of 31 more areas – at least 56 metros in total.

Ultimately, we'll plan to reach more than 14 million residential and commercial locations with fiber.

AT&T has invested nearly \$825 million in its wireless and wireline networks in Oklahoma from 2013 through 2015. This drives upgrades to reliability, coverage, speed and performance for residents and business customers.

Additionally, our AT&T Business Fiber internet service is already available to small businesses in parts of more than 180 U.S. cities, making it possible to download and upload at speeds up to 300 megabits per second.⁶ Certain markets now have speeds up to 1 gigabit per second available over AT&T Business Fiber. We plan to expand to additional markets this summer. It supports business applications, such as video conferencing, working in the cloud and disaster recovery.
