

AT&T Invests Nearly \$3.3 Billion Over Three-Year Period to Keep Florida Connected

TALLAHASSEE, Fla., June 23, 2020 – AT&T* is proud to have the nation’s best and also fastest wireless network,¹ as well as the largest network in North America.² From 2017-2019, we invested nearly \$3.3 billion in our wireless and wireline networks in Florida to expand coverage and improve connectivity in more communities.

That figure includes investments of:

- More than \$1 billion in the Miami-Fort Lauderdale-West Palm Beach area;
- More than \$425 million in the Orlando-Kissimmee-Sanford area;
- Nearly \$200 million in the Tampa-St. Petersburg-Clearwater area; and
- Nearly \$300 million in the Jacksonville area.

Network upgrades completed in these four markets in 2019 include:

- More than 1,800 capacity adds to cell sites to accommodate more network traffic
- 55 new cell sites
- Several Distributed Antenna System projects to boost indoor and outdoor coverage at key venues
- Deployment of small cells to densify our network and provide additional coverage

Our investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for Florida’s first responders using the [FirstNet](#) network.

Today, our 4G LTE network covers more than 330 million people.³ That’s more than 2.61 million square miles and over 99% of all Americans.⁴

We also expanded access to high-speed internet in Florida by building more than 1.3 million additional fiber connections in the Miami-Fort Lauderdale, Tampa-St. Petersburg-Sarasota, West Palm Beach-Fort Pierce, Orlando-Daytona-Melbourne, Jacksonville-Brunswick, Gainesville, Panama City, Mobile-Pensacola and Tallahassee-Thomasville markets.

“We know that our continued investment in Florida is vital to keeping people connected – from public safety personnel during a crisis to friends, family and loved ones on a daily basis,” said Joe York, president, AT&T Florida. “We’re committed to keeping you connected when and where you need it most. We show up for our customers and communities. That’s what we do. It’s who we are.”

More details about our wireless coverage in Florida, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Building the Future of Wireless Connectivity, Today

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. Florida customers are already experiencing the power of 5G in cities like Tampa, Bradenton and Sarasota and we're committed to bringing next-generation 5G coverage to more communities across the state as we build toward nationwide coverage this year.

We deliver the 5G experience to both consumers and businesses by deploying two types of 5G technology:

- **5G** over sub-6 spectrum is expected to enable faster responses over broader distances on new devices and is now available in nine Florida markets.
- **5G+** delivers ultra-fast speeds and response times, capable of 1+ Gbps, using 5G technology and new millimeter wave spectrum, unlocking unprecedented experiences in iconic destinations and key venues. It's ideal for businesses, universities, hospitals and sports venues and is currently deployed in parts of Miami, Miami Gardens, Orlando and Jacksonville.

FirstNet: Transforming Public Safety Communications

We're honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. And we take our responsibility to deliver FirstNet seriously.

Building upon our current and planned investments in Florida we continue to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across Florida, we've boosted the network with high-quality Band 14 spectrum in communities such as Miami, West Palm Beach, Tampa, Orlando and Jacksonville. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since beginning the FirstNet network expansion, we've launched new FirstNet cell sites in Orange, Lake, Citrus, Gulf, Suwannee, Lee, Putnam and Glades counties.
- **Public safety-specific advanced capabilities** – FirstNet is providing Florida public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced

capabilities enable FirstNet to perform faster than any commercial network⁵ and bring its subscribers the unthrottled connectivity they need.

- **Unparalleled emergency support** – Florida agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.
- **Free Smartphones for Life for Public Safety Agencies** – We have a responsibility to public safety unlike any other wireless carrier. That’s why Florida agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.⁶ This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across Florida is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.

Our commitment to Florida

AT&T believes everyone in our community should have access to the educational and employment opportunities that will define Florida’s future. That’s why we launched Believe Miami, a local initiative focused on removing barriers that keep local youth and young adults from achieving their dreams. This employee-led campaign continues to create positive change in our communities.

In addition to the program mentioned above, AT&T’s commitment to Florida includes programs like:

- **The Connect America Fund** – Through our participation in the FCC’s Connect America Fund universal service program, we have been helping to meet the connectivity needs of customers in largely rural areas and to expand the opportunities enabled by internet access. By the end of 2019, we offered high-speed internet access to over 20,300 locations in 20 counties across Florida in mostly rural areas through technologies like Fixed Wireless Internet.

This is all made possible by our talented, dedicated AT&T team members who are committed to being there and are the driving force behind our efforts to expand wireless connectivity both in Florida and across the country. That’s why we believe in investing in our employees and workforce. In 2019, *Fortune* and Great Place to Work named us one of the [Best Big Companies to Work For](#).
