

## **AT&T Invests More Than \$1.1 Billion Over Three-Year Period to Keep Indiana Connected**

INDIANAPOLIS, JUNE 30, 2020 – AT&T\* is proud to have the nation’s best and also fastest wireless network,<sup>1</sup> as well as the largest network in North America.<sup>2</sup> From 2017-2019, we invested more than \$1.1 billion in our wireless and wireline networks in Indiana to expand coverage and improve connectivity in more communities.

That investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for Indiana’s first responders using the [FirstNet](#) network.

“We know that investing in Indiana is vital to ensuring that people stay in touch – from first responders during a crisis, to friends, family and loved ones on a daily basis,” said Bill Soards, President, AT&T Indiana . “We’re committed to keeping you connected when and where you need it most. We show up for our customers and communities. That’s what we do. It’s who we are.”

Today, our 4G LTE network covers more than 330 million people.<sup>3</sup> That’s more than 2.61 million square miles and over 99% of all Americans.<sup>4</sup>

We also expanded access to high-speed internet in Indiana by building more than 380,000 additional fiber connections in Indianapolis and South Bend.

“Indiana’s connectivity has been put to the test over the last few months, and we’re so pleased that our broadband networks performed well under heavy pressure,” said Indiana Lt. Gov. Suzanne Crouch. “The state remains committed to working with providers like AT&T, who continue to invest heavily in broadband connectivity for Hoosiers. And those investments clearly paid off during this pandemic for our citizens, businesses and public safety.”

More details about our wireless coverage in Indiana, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

### **Building the Future of Wireless Connectivity, Today**

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. Indiana customers are already experiencing the power of 5G in cities like Evansville, Fort Wayne, Indianapolis, Gary and South Bend, and we’re committed to bringing next-generation 5G coverage to more communities across the state as we build toward nationwide coverage this year.

We deliver the 5G experience to both consumers and businesses by deploying two types of 5G technology:

- **5G** over sub-6 spectrum is expected to enable faster responses over broader distances on new devices and is now available in 190 markets across the country, including those in Indiana noted earlier.
- **5G+** delivers ultra-fast speeds and response times, capable of 1+ Gbps, using 5G technology and new millimeter wave spectrum, unlocking unprecedented experiences in iconic destinations and key venues. It's ideal for businesses, universities, hospitals and sports venues and is currently deployed in parts of 35 U.S. cities, including Indianapolis.

### **FirstNet: Transforming Public Safety Communications**

We're honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. And we take our responsibility to deliver FirstNet seriously.

Building upon our current and planned investments in Indiana, we continue to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across Indiana, we've boosted the network with high-quality Band 14 spectrum in communities such as Indianapolis, Gary, South Bend, Fort Wayne and Evansville, among others. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since beginning the FirstNet network expansion, we've launched new FirstNet cell sites in Brown, Lawrence, Morgan and Decatur counties, among others.
- **Public safety-specific advanced capabilities** – FirstNet is providing Indiana public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to perform faster than any commercial network<sup>5</sup> and bring its subscribers the unthrottled connectivity they need.
- **Unparalleled emergency support** – Indiana agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.

- **Free Smartphones for Life for Public Safety Agencies** – We have a responsibility to public safety unlike any other wireless carrier. That’s why Indiana agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.<sup>6</sup> This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across Indiana is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.

### **Our commitment to Indiana**

In addition to the programs mentioned above, AT&T’s commitment to Indiana includes programs like:

- **The Connect America Fund** – Through our participation in the FCC’s Connect America Fund universal service program, we have been helping to meet the connectivity needs of customers in largely rural areas and to expand the opportunities enabled by internet access. By the end of 2019, we offered high-speed internet access to over 36,000 locations across Indiana in mostly rural areas through technologies like Fixed Wireless Internet.

This is all made possible by our talented, dedicated AT&T team members who are committed to being there and are the driving force behind our efforts to expand wireless connectivity both in Indiana and across the country. That’s why we believe in investing in our employees and workforce. In 2019, *Fortune* and Great Place to Work named us one of the [Best Big Companies to Work For](#).

<sup>1</sup> Best Network based on 2019 GWS OneScore. Fastest based on analysis by Ookla® of Speedtest Intelligence® data median download speeds for Q1 2020. Ookla trademarks used under license and reprinted with permission.

<sup>2</sup> Based on comparison of carrier owned & operated networks. No AT&T on-net coverage in select countries, including Canada.

<sup>3</sup> Coverage includes non-AT&T network areas covered by roaming agreements with third parties.

<sup>4</sup> Based on overall coverage in U.S. licensed areas. Coverage not available everywhere. AT&T’s 4G LTE coverage is not equivalent to its overall network coverage.
