

AT&T Invests \$700 Million Over Three-Year Period to Keep Kansas Connected

TOPEKA, Kan., July 8, 2020 – AT&T* is proud to have the nation’s best and also fastest wireless network,¹ as well as the largest network in North America.² From 2017-2019, we invested more than \$700 million in our wireless and wireline networks in Kansas, including more than \$350 million in the Kansas City metropolitan area.

That investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for Kansas’ first responders using the [FirstNet](#) network.

Today, our 4G LTE network covers more than 330 million people.³ That’s more than 2.61 million square miles and over 99% of all Americans.⁴

We also expanded access to high-speed internet in Kansas by building more than 200,000 additional fiber connections in the Kansas City metropolitan area.

“AT&T’s investment in Kansas highlights our dedication to ensure that our residents and businesses can have the connectivity they need, especially during these uncertain times,” said Molly Kocour Boyle, president of AT&T Kansas. “By expanding coverage and boosting performance, AT&T is working to grow the local economy and enhance the lives of Kansas’s residents.”

“AT&T’s investment is the right idea at the right time,” said David Warm, Executive Director of Mid-America Regional Council. “The magnitude of this capital outlay will help propel our regional economy into recovery. Enhancing critical telecommunications infrastructure will position our region for long-term competitive growth. And extending access to more Kansas Citians will enable our success to be more inclusive at a moment when nothing is more important.”

More details about our wireless coverage in Kansas, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Building the Future of Wireless Connectivity, Today

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. Kansas customers are already experiencing the power of 5G in cities like Kansas City, and we’re committed to bringing next-generation 5G coverage to more communities across the state as we build toward nationwide coverage this year. 5G over sub-6

spectrum is expected to enable faster responses over broader distances on new devices and is now available in 355 markets.

FirstNet: Transforming Public Safety Communications

We're honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. And we take our responsibility to deliver FirstNet seriously.

Building upon our current and planned investments in Kansas, we continue to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across Kansas, we've boosted the network with high-quality Band 14 spectrum in communities such as Wichita, Topeka and Reno. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since beginning the FirstNet network expansion, we've launched new FirstNet cell sites in Thomas, Logan, Smith and Barber counties.
- **Public safety-specific advanced capabilities** – FirstNet is providing Kansas public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to perform faster than any commercial network⁵ and bring its subscribers the unthrottled connectivity they need.
- **Unparalleled emergency support** – Kansas agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.
- **Free Smartphones for Life for Public Safety Agencies** – We have a responsibility to public safety unlike any other wireless carrier. That's why Kansas agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.⁶ This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across Kansas is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.
