

AT&T Invests Nearly \$1.5 Billion Over Three-Year Period to Keep Michigan Connected

LANSING, Mich., JUNE 30, 2020 – AT&T* is proud to have the nation’s best and also fastest wireless network,¹ as well as the largest network in North America.² From 2017-2019, AT&T invested nearly \$1.5 billion in its wireless and wireline networks in Michigan to expand coverage and improve connectivity in more communities.

That investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for Michigan’s first responders using the [FirstNet](#) network.

Today, AT&T’s 4G LTE network covers more than 330 million people.³ That’s more than 2.61 million square miles and over 99% of all Americans.⁴

“We know that our continued investment in Michigan is vital to keeping people connected – from public safety personnel during a crisis to friends, family and loved ones on a daily basis,” said David Lewis, President, AT&T Michigan. “We’re committed to keeping you connected when and where you need it most. We show up for our customers and communities. That’s what we do. It’s who we are.”

AT&T also expanded access to high-speed internet in Michigan by building more than 390,000 additional fiber connections across the state.

“Strong connectivity ensures that Michiganders in all parts of the state can be successful,” said State Senator Dan Lauwers, Chairman of the Senate Energy and Technology Committee. “AT&T’s continued investment throughout our state shows their dedication to improving connectivity, especially as people rely more on internet at home during the pandemic.”

More details about our wireless coverage in Michigan, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Building the Future of Wireless Connectivity, Today

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. Michigan customers are already experiencing the power of 5G in cities like Detroit, Flint and Kalamazoo, and AT&T is committed to bringing next-generation 5G coverage to more communities across the state while building toward nationwide coverage this year.

AT&T delivers the 5G experience to both consumers and businesses by deploying two types of 5G technology:

- **5G** over sub-6 spectrum is expected to enable faster responses over broader distances on new devices and is now available in 355 markets.
- **5G+** delivers ultra-fast speeds and response times, capable of 1+ Gbps, using 5G technology and new millimeter wave spectrum, unlocking unprecedented experiences in iconic destinations and key venues. It's ideal for businesses, universities, hospitals and sports venues and is currently deployed in parts of 35 cities.

FirstNet: Transforming Public Safety Communications

AT&T is honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. And AT&T takes the responsibility to deliver FirstNet seriously.

Building upon its current and planned investments in Michigan, AT&T continues to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across Michigan, AT&T has boosted the network with high-quality Band 14 spectrum in communities such as Detroit, Grand Rapids and Kalamazoo. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. AT&T looks at Band 14 as public safety's VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since the beginning of the FirstNet network expansion, AT&T has launched new FirstNet cell sites in Allergan, Chippewa, Iron and Van Buren counties.
- **Public safety-specific advanced capabilities** – FirstNet is providing Michigan public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to perform faster than any commercial network⁵ and bring its subscribers the unthrottled connectivity they need.
- **Unparalleled emergency support** – Michigan agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.
- **Free Smartphones for Life for Public Safety Agencies** – AT&T has a responsibility to public safety unlike any other wireless carrier. That's why Michigan agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency

management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.⁶ This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across Michigan is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.

AT&T's commitment to Michigan

In addition to the programs mentioned above, AT&T's commitment to Michigan includes programs like:

- **The Connect America Fund** – Through AT&T's participation in the FCC's Connect America Fund universal service program, AT&T has helped to meet the connectivity needs of customers in largely rural areas and to expand the opportunities enabled by internet access. By the end of 2019, AT&T offered high-speed internet access to over 69,000 locations across Michigan in mostly rural areas through technologies like Fixed Wireless Internet.

This is all made possible by AT&T's talented, dedicated team members who are committed to being there and are the driving force behind its efforts to expand wireless connectivity both in Michigan and across the country. That's why AT&T believes in investing in its employees and workforce. In 2019, *Fortune* and Great Place to Work named AT&T one of the [Best Big Companies to Work For](#).

¹ Best Network based on 2019 GWS OneScore. Fastest based on analysis by Ookla® of Speedtest Intelligence® data median download speeds for Q1 2020. Ookla trademarks used under license and reprinted with permission.

² Based on comparison of carrier owned & operated networks. No AT&T on-net coverage in select countries, including Canada.

³ Coverage includes non-AT&T network areas covered by roaming agreements with third parties.

⁴ Based on overall coverage in U.S. licensed areas. Coverage not available everywhere. AT&T's 4G LTE coverage is not equivalent to its overall network coverage.
