

AT&T Invests Nearly \$110 Million Over Three-Year Period to Keep New Hampshire Connected

CONCORD, N.H., JUNE 24, 2020 – AT&T* is proud to have the nation’s best and also fastest wireless network,¹ as well as the largest network in North America.² From 2017-2019, we invested nearly \$110 million in our wireless and wireline networks in New Hampshire to expand coverage and improve connectivity in more communities.

That investment has increased reliability, coverage and overall performance for residents and businesses, which is essential for connecting our customers with family, friends and colleagues – no matter the distance. It’s also improved critical communications services for New Hampshire’s first responders using the [FirstNet](#) network.

Today, our 4G LTE network covers more than 330 million people.³ That’s more than 2.61 million square miles and over 99% of all Americans.⁴

“We know that our continued investment in New Hampshire is vital to keeping people connected – from public safety personnel during a crisis, to friends, family and loved ones on a daily basis,” said Owen Smith, President, AT&T New Hampshire. “We’re committed to keeping you connected, because we care about our customers and communities. That’s what we do. It’s who we are.”

More details about our wireless coverage in New Hampshire, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Building the Future of Wireless Connectivity, Today

5G is the future of wireless technology and is poised to jumpstart the next wave of unforeseen mobile innovation. New Hampshire customers are already experiencing the power of 5G in cities like Portsmouth, and we’re committed to bringing next-generation 5G coverage to more communities across the state as we build toward nationwide coverage this year. 5G over sub-6 spectrum is expected to enable faster responses over broader distances on new devices and is now available in 190 markets.

FirstNet: Transforming Public Safety Communications

We’re honored to work with the First Responder Network Authority (FirstNet Authority) to build and manage FirstNet – the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America’s first responders and the extended public safety community. And we take our responsibility to deliver FirstNet seriously.

Building upon our current and planned investments in New Hampshire, we continue to extend the reach, and [increase the coverage](#), capacity and capabilities of the FirstNet network:

- **Purpose-built network enhancements** – Across New Hampshire, we’ve boosted the network with high-quality Band 14 spectrum in Manchester, Portsmouth, locations in Carroll and Coos counties and more. Band 14 is nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety’s VIP lane: in an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. In addition, since beginning the FirstNet network expansion, we’ve launched new FirstNet cell sites in Grafton, Cheshire, Rockingham and Merrimack counties.
- **Rural New Hampshire** – FirstNet is built for every first responder in the country – career or volunteer; federal, tribal, state or local; urban, suburban or rural. That’s why we’re collaborating with rural network providers to help connect [remote parts of America](#) and build out additional FirstNet LTE coverage in New Hampshire.
- **Public safety-specific advanced capabilities** – FirstNet is providing New Hampshire public safety with dedicated access when they need it, as well as an entire communication ecosystem with unique benefits like mission-centric devices, certified applications, *always-on* priority and preemption and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to perform faster than any commercial network⁵ and bring its subscribers the unthrottled connectivity they need.
- **Unparalleled emergency support** – New Hampshire agencies on FirstNet also have 24/7 access to a nationwide fleet of 76 deployable network assets. These assets can either be deployed for planned events or called upon in [emergencies](#) at no additional charge to help first responders stay connected and operate faster, safer and more effectively when lives are on the line. FirstNet Response Operations – led by a group of former first responders – guides the deployment of the FirstNet deployable assets based on the needs of public safety.
- **Free Smartphones for Life for Public Safety Agencies** – We have a responsibility to public safety unlike any other wireless carrier. That’s why New Hampshire agencies spanning law enforcement, fire, EMS, healthcare, hospital emergency departments, emergency management and 911 operations on FirstNet can stay up-to-date with [smartphones for life](#) at no additional cost.⁶ This means first responders across agencies of all sizes will have affordable access to *their* network.

The FirstNet network expansion across New Hampshire is being done with direct feedback from state and public safety officials. This helps ensure FirstNet meets the short- and long-term needs of the public safety community.

Our commitment to New Hampshire

In addition to the programs mentioned above, AT&T’s commitment to New Hampshire includes programs like:

- AT&T New Hampshire and AT&T Foundation: Over the past three years, AT&T New Hampshire and the AT&T Foundation have provided \$180,000 in community support to organizations across the state to support a variety of initiatives like education, hunger relief and more.
- New Hampshire Jobs for America's Grads: AT&T is proud to support this statewide, private nonprofit working with students who face barriers to education.
- It Can Wait: AT&T works closely with local and state officials and organizations to spread awareness about the dangers of distracted driving.

This is all made possible by our talented, dedicated AT&T team members who are committed to being there and are the driving force behind our efforts to expand wireless connectivity both in New Hampshire and across the country. That's why we believe in investing in our employees and workforce. In 2019, *Fortune* and Great Place to Work named us one of the [Best Big Companies to Work For](#).

¹ Best Network based on 2019 GWS OneScore. Fastest based on analysis by Ookla® of Speedtest Intelligence® data median download speeds for Q1 2020. Ookla trademarks used under license and reprinted with permission.

² Based on comparison of carrier owned & operated networks. No AT&T on-net coverage in select countries, including Canada.

³ Coverage includes non-AT&T network areas covered by roaming agreements with third parties.

⁴ Based on overall coverage in U.S. licensed areas. Coverage not available everywhere. AT&T's 4G LTE coverage is not equivalent to its overall network coverage.
