AT&T Fiber Now Available via a 100% Fiber Network in Columbus

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Parts of Columbus Area

COLUMBUS, Ohio, Oct. 11, 2016 — AT&T¹ launched ultra-fast internet service in parts of the Columbus area.² We now connect eligible homes, apartments and small business locations in the area to a 1 gigabit internet connection³ on our 100% fiber network under the AT&T FiberSM umbrella brand.

We've also made AT&T FiberSM available in parts of New Albany, Hilliard, Dublin and surrounding communities. We plan to expand access to ultra-fast internet speeds in additional parts of the Columbus area in the future.

"I'm pleased to have AT&T bring their network expertise and this ultra-fast internet service to residents and small businesses in my district," said State Representative Anne Gonzalez. "This is a positive investment that brings lasting change and future opportunity."

"AT&T's ultra-fast internet will contribute to our growing economy and high quality of life in New Albany," said New Albany Mayor Sloan Spalding. "Access to high-speed internet will help create new jobs, grow small businesses and improve access to educational opportunities."

The Columbus area is one of [67 metros](#) where we're making our fastest internet service available. We now market our ultra-fast service to over 3 million locations, of which over 500,000 include apartments and condo units. In the Columbus area, there are nearly 150 apartments and condo units on our 100% fiber network.

We're on track to exceed the 12.5 million locations planned by mid-2019.

"AT&T is committed to extending access to high-speed internet in the Columbus area because our customers are increasingly interacting with their world in more data-intensive ways," said AT&T Ohio President Adam Grzybicki. "A growing number of people are streaming content directly from their devices, and interacting with family and friends through live videos. For these reasons, we are proud to now offer our fastest internet speeds in Columbus and its surrounding communities."

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$90 a month. Customers may be able to add

one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer's needs.

Internet customers on the 100% fiber network have access to the latest Wi-Fi technology. They can enjoy our best in-home Wi-Fi experience, faster Wi-Fi speeds, broad coverage and support for all of their devices.

What can I do with a service that starts with a 1 gig connection?

With internet speeds 20x faster than the average cable customer⁴, you can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁵

You can also instantly access and stream the latest online movies, music and games. With these ultra-fast speeds, customers can seamlessly perform tasks like telecommuting, video-conferencing, uploading and downloading photos and videos, connect faster to the cloud and more.

What is AT&T Fiber?

The 100% fiber network under the AT&T Fiber umbrella brand gives customers the power to choose from a wide range of internet speeds over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers to a broad range of internet speeds.

AT&T in Columbus, Ohio:

AT&T has invested nearly \$275 million in its wireless and wired networks in Columbus between 2013 through 2015. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses.

¹ AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand name and not by AT&T Inc.

² Initial availability limited to select areas. May not be available in your area. Go to att.com/fibermap to see if you qualify.

³ Internet speed claims represent maximum network service capability speeds. Actual customer speeds may vary and are not guaranteed. Actual speeds vary based on factors including site traffic, content provider server capacity, internal network management factors, device capabilities and use of other AT&T services. For more information, go to:

www.att.com/speed101.

⁴ More than 20x faster based on a maximum download speed of AT&T service over 100% fiber network (1Gbps speed tier) vs. weighted average cable Internet customer's speed of major U.S. cable providers per the FCC 2015 Measuring Broadband America – Fixed Broadband Report. Actual speeds may vary.

⁵ Speed/Time examples are estimates.
