100% Fiber Network Powered by AT&T Fiber Expands in Oklahoma City Area

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Additional Oklahoma City Area Cities

OKLAHOMA CITY, Aug. 22, 2017 — AT&T* is now offering a 1 gigabit connection¹ on our 100% fiber network powered by AT&T FiberSM to customer locations in the Oklahoma City area, including in parts of Midwest City, Del City, The Village, Warr Acres, Nichols Hills and surrounding areas.²

We previously announced ultra-fast internet speeds available in parts of Oklahoma City and Tulsa and surrounding communities.

The Oklahoma City area is one of 57 metros nationwide where our ultra-fast internet service is currently available. We plan to reach at least 75 metros with our fastest internet service.

Today, we market a 1 gigabit connection¹ on our 100% fiber network to over 5.5 million locations across 57 metros. We plan to reach at least 12.5 million locations by mid-2019.

“Our customers are increasingly interacting with their world in more data-intensive ways,” said Steve Hahn, president of AT&T Oklahoma. “A growing number of people are streaming content directly from their devices, and interacting with family and friends through live videos. For these reasons, we’re continuing to expand the availability of our fastest internet speeds to more communities.”

AT&T Internet 1000, is our fastest internet speed tier on our 100% fiber network. It is offered at \$70 per month for customers who bundle with another AT&T service on a single bill, or only \$80 per month standalone. Either way, there are no extra monthly fees and equipment is included with a 12-month agreement.³ Customers are also able to add our [award-winning DIRECTV](#) or U-verse TV service as well. We have single, double and triple play offers to fit each customer’s needs.

What can I do with a service that starts with a 1 gig connection?

You can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁴ Customers can enjoy our fastest upload and download speeds.

You can also quickly access and stream the latest online movies, music and games. These ultrafast speeds let you easily telecommute, video-conference, upload and download photos and videos, and connect faster to the cloud.

What is AT&T Fiber?

Our 100% fiber network under the AT&T Fiber umbrella brand lets customers choose from a range of internet speeds, all over an ultrafast internet connection. This 100% fiber network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.

Frost & Sullivan recently recognized AT&T for its leadership in high-speed internet services. It awarded AT&T the 2016 Company of the Year Award for Broadband Access. The analyst firm praised AT&T for “rapidly evolving into a new form of telecommunications company; one that is based on the delivery of broadband access, both fixed and mobile, as well as services that ride that access.”

AT&T in Oklahoma:

AT&T has invested more than \$775 million in its wireless and wireline networks in Oklahoma between 2014 through 2016. This drives upgrades to reliability, coverage, speed and performance for residents and business customers.

¹Actual customer speeds may vary. Download speeds are typically up to 940Mbps due to overhead capacity reserved to deliver the data.

²Initial availability limited to select areas. May not be available in your area. Go to <https://www.att.com/internet/> to see if you qualify.

³After 12 months, price moves to standard rate of \$90/mo.

⁴Speed/Time examples are estimates.
