

News Release

100% Fiber Network Powered by AT&T Fiber Expands in Tuscaloosa

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Northport and Tuscaloosa

TUSCALOOSA, March 23, 2017 —AT&T¹ is now offering a 1 gigabit connection² on our 100% fiber network powered by AT&T FiberSM to customer locations in Northport and Tuscaloosa, as well as additional parts of the Birmingham area, such as Calera and Helena.³

In addition to the homes and small businesses connected to our 100% fiber network in the Birmingham area, we connect nearly 25 area apartment and condo properties.

We previously announced ultra-fast internet speeds available in parts of Birmingham and surrounding communities. We plan to expand access to ultra-fast internet speeds in parts of Mountain Brook in the future.

The Birmingham area is one of 51 metros nationwide where our ultra-fast internet service is currently available. We plan to reach at least 67 metros with our fastest internet service.

“AT&T is committed to expanding access to ultra-fast internet as our customers increasingly interact with their world in more data-intensive ways,” said Fred McCallum, President of AT&T Alabama. “A growing number of people stream content directly from their devices and communicate with family and friends through live videos. AT&T continuously strives to anticipate and exceed the needs of our customers. In doing so, we are excited to expand the availability of our fastest internet speeds to more locations in urban and rural communities across our great state.”

We market our ultra-fast service to nearly 4 million customer locations, of which over 650,000 include apartments and condo units. We plan to reach 12.5 million locations by mid-2019.

“The strength of our state’s economy relies on innovation and investment, and it is exciting to have AT&T expanding access to ultra-fast internet in our community,” said Jim Page, President and CEO of the West Alabama Chamber of Commerce. “Advanced technology enriches the quality of life for area residents and business owners. I applaud AT&T’s continuing investment in Alabama.”

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$80 a month with a 12-month commitment.⁴

Customers may be able to add one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer's needs.

Internet customers on the 100% fiber network have access to our latest Wi-Fi technology. They can enjoy our best in-home experience with faster Wi-Fi speeds and broad coverage to seamlessly connect all their devices.

What can I do with a service that starts with a 1 gig connection?

These internet speeds are 20x faster than the average cable customer.⁵ You can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁶ Customers can enjoy our fastest upload and download speeds.

You can also quickly access and stream the latest online movies, music and games. These ultra-fast speeds let you easily telecommute, video-conference, upload and download photos and videos, and connect faster to the cloud.

What is AT&T Fiber?

The 100% fiber network under the AT&T Fiber umbrella brand lets customers choose from a range of internet speeds, all over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.

Frost & Sullivan recently recognized AT&T for its leadership in high-speed internet services. It awarded AT&T the 2016 Company of the Year Award for Broadband Access. The analyst firm praised AT&T for "rapidly evolving into a new form of telecommunications company; one that is based on the delivery of broadband access, both fixed and mobile, as well as services that ride that access."

AT&T in Alabama:

AT&T has invested nearly \$1.2 billion in its wireless and wireline networks in Alabama between 2013 through 2015. This drives upgrades to reliability, coverage, speed and performance for residents and business customers.

¹ AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand name and not by AT&T Inc.

² Actual customer speeds may vary. Download speeds are typically up to 940Mbps due to overhead capacity reserved to deliver the data.

³ Initial availability limited to select areas. May not be available in your area. Go to att.com/fibermap to see if you qualify.

⁴ After 12 months, price moves to standard rate of \$119/mo.

⁵ Available in select areas. 20x faster based on maximum download speed of AT&T Internet 1000 vs weighted average cable internet customers' speed of major U.S. cable providers per the FCC 2015 Measuring Broadband America – Fixed Broadband Report. Actual speeds vary.

⁶Speed/Time examples are estimates.
