AT&T Announces Availability of Super-Fast 5G+ Service at Mercedes-Benz Superdome

AT&T's 5G+ available for customers to experience while attending sporting events and other events at the iconic stadium

First responders in New Orleans gain access to 5G+ on FirstNet®, America's public safety network

NEW ORLEANS, April 8, 2021

What's the news? We're taking the fan experience to the next level with the introduction of **AT&T 5G+** at the Mercedes-Benz Superdome. 5G+ is our name for 5G delivered using millimeter wave spectrum, which is ideal for high-traffic areas. That means the players on the field won't be the only ones putting up unprecedented performances.

Why is this important? AT&T customers with a compatible device and qualifying plan will now have access to the super-fast speeds and increased connectivity that are ideal for iconic venues like the Superdome.¹

Who can use this? AT&T 5G+ will enable incredible innovation and unlock immersive experiences—especially when larger public gatherings are permitted and a stadium, packed with fans, can celebrate big wins once again.

In addition to fans, first responders on FirstNet in the New Orleans area will have access to AT&T 5G+ at the Mercedes-Benz Superdome. They will maintain voice communication through *always-on* priority and preemption on LTE and the intuitive FirstNet network will determine the best route for data traffic, whether that's 5G+ or LTE spectrum.

Where can I get it? AT&T 5G+ is available in parts of 38 cities and more than 20 venues across the country. Learn more about AT&T's 5G network at att.com/5gforyou and check out AT&T's 5G coverage in the New Orleans area [here](#).

What is FirstNet? FirstNet is the only nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. It is built with AT&T in public-private partnership with the federal government. [Our approach to 5G+ for public safety](#) is unlike anything else, and the FirstNet network is providing public safety with truly dedicated coverage and capacity when they need it. These advanced capabilities help fire, EMS and law enforcement save lives and protect their communities. Check out [FirstNet.com](#) for more about the value FirstNet is bringing to public safety.

"AT&T 5G+ will help take watching a game or concert at the Superdome to the next level. When the games kick off again this fall, AT&T 5G+ will be there to deliver experiences our fans won't soon forget."

- Tony Mokry, VPGM, AT&T Gulf States

"The Mercedes-Benz Superdome is recognized as one of the premier sports and entertainment venues worldwide. It's critical that the stadium provide cutting edge services to its fans and staff. We are delighted to share this vision with AT&T as evidenced by their new 5G+ installation at the Superdome."

- Alan Freeman, General Manager, ASM Global Managed Facilities New Orleans

1 5G+ is not available in all parts of Mercedes-Benz Superdome and requires compatible device and plan.
