

## **AT&T offers low-cost broadband to eligible customers through the Emergency Broadband Benefit**

*By using the federal program, eligible AT&T and Cricket Wireless customers can temporarily receive low or no-cost broadband*

DALLAS, May 13 – AT&T is helping to make broadband more affordable for the millions of eligible households who need it most.

Eligible new and existing AT&T and Cricket Wireless customers can now receive home internet or wireless service for little or even no cost if they take advantage of the [Emergency Broadband Benefit \(EBB\), administered by the Federal Communications Commission](#). The temporary program was established by Congress to help those economically affected by the COVID-19 pandemic and applies to either home broadband or broadband delivered by wireless.

Under the EBB program, qualifying customers can temporarily receive a benefit of up to \$50 per month. Those on qualifying Tribal lands can save up to \$75 per month.<sup>1</sup>

For example, qualifying new and existing customers on an AT&T Internet plan with speeds up to 300Mbps would pay \$5 a month or less.<sup>2</sup>

“The pandemic proved that all Americans need reliable broadband connections for everything from applying for jobs, to working at home, to participating in school,” said AT&T Communications CEO Jeff McElfresh. “We are eager to step up and work hand-in-hand with the federal government to provide relief to customers while helping to bridge the Digital Divide. We and others will also continue to work with Congress to create long-term sustainable solutions to help low-income families pay for broadband long after the program ends.”

### **When will the benefit be available to eligible plans?**

EBB eligible internet and prepaid wireless plans from AT&T as well as from Cricket Wireless are now available.

### **Which plans are eligible?**

Full details of all eligible plans from AT&T can be found at [att.com/ebb](https://att.com/ebb). Eligible Cricket Wireless plans can be found at [www.cricketwireless.com/broadbandbenefit](https://www.cricketwireless.com/broadbandbenefit).

The benefits can be applied to select plans for both new and existing customers. There is a limit of one benefit per eligible household. AT&T PREPAID and Cricket Wireless are offering the benefit in all 50 states and AT&T Internet is being offered throughout our 21-state footprint.

### **Here's how it works**

Customers must first apply and be approved for the EBB by the federal government at [getemergencybroadband.org](https://getemergencybroadband.org). They can get approved online in just a few minutes, although it could take up to a few days if the application requires a manual review.

Customers who have been approved will then be able to order eligible new AT&T internet or prepaid wireless service, or have the benefit applied to their existing service, if on an eligible plan. Details on the exact process is available at [att.com/EBB](https://att.com/EBB). Eligible Cricket Wireless customers can visit [www.cricketwireless.com/broadbandbenefit](https://www.cricketwireless.com/broadbandbenefit) to order service or have the benefit applied to their existing accounts.

### **What we've been doing**

Our support of EBB is a continuation of efforts to make broadband more affordable.

Five years ago, we introduced Access from AT&T, an AT&T-funded program that makes internet more affordable for customers by providing qualifying households with wireline internet service at discounted rates. This voluntary offer from AT&T has no contract or installation fee. Plus, it includes in-home Wi-Fi at no additional cost. Hundreds of thousands of Americans enjoy Access from AT&T, and we aim to build upon this voluntary program, partnering with government policymakers to ensure sustainable funding to keep broadband options affordable for qualifying households. And through the end of 2021, Access from AT&T customers will continue to have unlimited data with the data overage waiver.<sup>3</sup>

AT&T also [recently announced](#) that it will invest \$2 billion over the next 3 years through low-cost broadband service offerings and community investment to help close the digital divide.

<sup>3</sup>Eligibility is determined by the National Lifeline Eligibility Verifier (National Verifier), managed by the Universal Service Administrative Company (USAC). For more information on eligibility criteria for the EBB visit [getemergencybroadband.org](https://getemergencybroadband.org).

<sup>2</sup>Additional fees and taxes may apply. Internet speed claims represent maximum network service capabilities and based on wired connection to gateway. Actual customer speeds may vary based on a number of factors and are not guaranteed.

<sup>3</sup>AT&T may temporarily slow data speeds if the network is busy.

**\*About AT&T Communications**

We help family, friends and neighbors connect in meaningful ways every day. From the first phone call 140+ years ago to mobile video streaming, we @ATT innovate to improve lives. AT&T Communications is part of AT&T Inc. (NYSE:T). For more information, please visit us at [att.com](https://att.com).
