Press Release

New FirstNet Cell Sites Launch across Maine to Support First Responders

New Infrastructure Will Help Advance Public Safety, Improve Connectivity for Area Residents and Visitors

Maine, Feb. 15, 2022

What's the news? Maine's first responders are getting a major boost in their wireless communications thanks to the [FirstNet](#)[®] network expansion currently underway by [AT&T](#)^{*}. We've added **new, [purpose-built cell sites](#) located in Bucksport, Naples and Ogunquit**, which will cover surrounding areas, neighborhoods and businesses. These new sites are giving first responders on FirstNet – America's public safety network – access to *always-on*, 24-hours-a-day priority and preemption across voice and data.

In addition, AT&T recently added new cell sites in **Ellsworth, Rockland and Sanford** to enhance the area's 4G LTE coverage and help give customers faster, more reliable wireless service. This enhancement also brings Band 14 spectrum to the area, which is the nationwide, high-quality spectrum set aside by the government specifically for FirstNet. We look at Band 14 as public safety's VIP lane. In an emergency, this band – or lane – can be cleared and locked just for FirstNet subscribers. When not in use by FirstNet subscribers, AT&T customers can enjoy Band 14's added coverage and capacity.

From 2018 to 2020, AT&T expanded coverage and improved connectivity in more communities by investing [nearly \\$150 million](#) in its wireless network in Maine. To further expand coverage, AT&T completed updates to over 150 recently acquired, existing cell sites across central and northern Maine in 2021. As of December 2021, AT&T is now Maine's largest network.

Why is this important? We consider FirstNet the most important wireless network in the country because it serves our first responders. And unlike commercial networks, FirstNet provides dedicated mobile broadband. So that AT&T and the First Responder Network Authority (FirstNet Authority) are putting coverage and capacity where first responders need it most, the FirstNet build is guided by direct feedback from state and public safety officials. This helps ensure Maine first responders connect to the critical information they need – every day and in every emergency.

What are the benefits to first responders? Building upon AT&T's current and planned investments in Maine, we're actively extending the reach of FirstNet to give agencies large and

small the reliable, unthrottled connectivity and modern communications tools they need. These sites were constructed using Band 14 spectrum, as well as AT&T commercial spectrum. That means during an emergency, only those on the FirstNet network will be able to access Band 14 spectrum, further elevating their connected experience and emergency response.

How does this help Maine residents? This new infrastructure will help improve the overall coverage experience for AT&T wireless customers in these areas. Residents, visitors and businesses can take advantage of the enhanced 4G LTE coverage, as well as Band 14 when capacity is available.

What is FirstNet? FirstNet is the only nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community. Shaped by the vision of Congress and the first responder community following the 9/11 terrorist attacks, FirstNet stands above commercial offerings. It is built with [AT&T](#) in public-private partnership with the FirstNet Authority – an independent agency within the federal government. The FirstNet network provides public safety with truly dedicated coverage and capacity when they need it, including unique benefits like *always-on* priority and preemption, and high-quality Band 14 spectrum. These advanced capabilities enable FirstNet to help fire, EMS, EMA, law enforcement and 9-1-1 personnel save lives and protect their communities.

What people are saying:

OWEN SMITH

President, AT&T New England

“Maine’s first responders deserve reliable coverage across the state to help them effectively and efficiently address incidents. And with FirstNet, that’s exactly what they’re getting. We have a [responsibility](#) unlike any other network provider, and couldn’t be more pleased to support the public safety mission by bringing Maine first responders – and residents – greater access to the connectivity they need.”

EDWARD PARKINSON

CEO, FirstNet Authority

“FirstNet is a dedicated broadband platform for public safety, by public safety. We worked hand-in-hand with the Maine public safety community to understand their needs for the network. And this new site is a prime example of how that input and feedback is becoming
