Several of the ways we are supporting the Goals include:

**Goal 3.6** • By 2020, halve the number of global deaths and injuries from road traffic accidents

In Latin America and the United States, AT&T is committed to saving lives by raising awareness and sharing a simple message through our signature philanthropic initiative, AT&T Aspire, and through our international program ESCUELA+. We are leveraging technology, relationships and social innovation to help all students make their biggest dreams a reality.

**Goal 4** • Ensure inclusive and quality education for all and promote lifelong learning

AT&T is driving innovation in education to promote student success in school and beyond through our signature philanthropic initiative, AT&T Aspire, and through our international program ESCUELA+. We are leveraging technology, relationships and social innovation to help all students make their biggest dreams a reality.

**Goal 5** • Achieve gender equality and empower all women and girls

Providing women and girls with equal access to education, health care, decent work, and representation in political and economic decision-making processes will fuel sustainable economies and benefit societies and humanity at large.

**Goal 9** • Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

Investments in infrastructure—transport, irrigation, energy and information and communication technology—are crucial to achieving sustainable development and empowering communities in many countries. It has long been recognized that growth in productivity and incomes, and improvements in health and education outcomes require investment in infrastructure. Inclusive and sustainable industrial development is the primary source of income generation, allows for rapid and sustained increases in living standards for all people, and provides the technological solutions to environmentally sound industrialization.

**Goal 11** • Make cities inclusive, safe, resilient and sustainable

Many challenges exist to maintaining cities in a way that continues to create jobs and prosperity while not straining land and resources—including congestion, lack of funds to provide basic services, a shortage of adequate housing and declining infrastructure. The challenges cities face can be overcome in ways that allow them to continue to thrive and grow, while improving resource use and reducing pollution and poverty.

**Goal 13** • Take urgent action to combat climate change and its impacts

Climate change is global challenge that is disrupting national economies and affecting lives. People are experiencing the significant impacts of climate change, which include changing weather patterns, rising sea level, and more extreme weather events. Without action, the world’s average surface temperature is projected to increase by 3.2 degrees Celsius this century.
