

AT&T supports the
SUSTAINABLE DEVELOPMENT GOALS

Several of the ways we are supporting the Goals include:

Goal 3.6 • By 2020, halve the number of global deaths and injuries from road traffic accidents

In Latin America and the United States, AT&T is committed to helping save lives by raising awareness and sharing a simple message through our *It Can Wait*® campaign: keep your eyes on the road, not on your phone. In 2015, we expanded into Mexico with the launch of *Puede Esperar*. To date, we have collected more than 8 million pledges and 3.5 million downloads of our DriveMode® app, raising awareness about this critical issue and encouraging people to take action to prevent distracted driving.

Goal 4 • Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

AT&T is driving innovation in education to promote student success in school and beyond through our international program ESCUELA+ and our signature philanthropic initiative, AT&T Aspire. We have reached more than 850,000 students in more than 6,000 schools across Latin America and have provided more than 1 million hours of mentoring to students in the U.S.

Goal 5 • Achieve gender equality and empower all women and girls

AT&T has long supported programs around the world that encourage gender equality and the empowerment of women in business. This includes support for programs like PEACE THROUGH BUSINESS®, which provides training and mentorship to women entrepreneurs in Rwanda and Afghanistan, as well as Laboratoria, which is helping to create the next generation of women web developers in Mexico. In our own operations, we provide support for programs that increase female participation in management positions around the globe including efforts like our “Women in Action” program in Mexico, which has resulted in a 10% increase over the last year in the number of women in leadership positions.

Goal 8 • Promote inclusive and sustainable economic growth, employment and decent work for all

Global communications networks have revolutionized the way we live, work and play. Mobile broadband has the potential to help us transition to a more efficient economy. Already, it has transformed the way we communicate, educate our children, deliver health care, consume energy, obtain news and other information, engage in commerce and interact with government. Since 2011, AT&T has invested more than \$140 billion – including capital investments in wireless and wireline networks and acquisitions of wireless spectrum and operations – to build out one of the most advanced wireless, fiber and IP networks in the world.

Goal 9 • Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

AT&T is committed to expanding access to fast, reliable connections around the world. In Latin America, we are helping bridge the digital divide by extending cutting-edge broadband technology to rural communities, increasing connectivity to those who have previously gone without. In Mexico, we have committed to covering 100 million people with LTE by the end of 2018.

Goal 11 • Make cities inclusive, safe, resilient and sustainable

Nearly 28 million connected devices were on our network as of Q1 2016. AT&T is committing our resources and expertise in the Internet of Things to help improve citizens’ quality of life and create new economic opportunities through the development of smart cities.

Goal 13 • Take urgent action to combat climate change and its impacts

AT&T is committed to operating in an environmentally responsible and sustainable manner, and we also seek to help customers to make more sustainable choices. By 2025, our goal is to enable carbon savings 10x the footprint of our operations by enhancing the efficiency of our network and delivering sustainable customer solutions.
