

News Release

AT&T Invests More than \$300 Million Over Three-Year Period to Connect Local Customers in Minnesota

MINNEAPOLIS, Minn., July 7, 2021 - AT&T* is proud to connect customers across the country by continuing to grow the nation's best network¹. From 2018-2020, we expanded coverage and improved connectivity in more communities by investing more than \$300 million in our wireless and wireline networks in Minnesota, including nearly \$150 million in Minneapolis-St. Paul.

AT&T's commitment to communities across the country continues and spans all layers of our network—from fiber to 5G to [FirstNet®](#). These investments are essential to connecting our customers with their family, friends and colleagues by increasing the network's speed, reliability, coverage and overall performance.

AT&T further improved critical communications for Minnesota's first responders and improved public safety with [FirstNet®](#) – America's public safety network. We also recently announced that AT&T will invest \$2 billion over the next 3 years to help address the [digital divide](#) nationwide.

"From connecting family and loved ones to helping first responders during a crisis, AT&T is committed to investing in Minnesota to build state-of-the-art infrastructure that will keep people connected," said AT&T Minnesota President Paul Weirtz. "By continuing to improve our network at the state and local levels, we are helping businesses grow in Minnesota and helping to ensure that our customers and communities stay connected throughout the country."

More details about our wireless coverage in Minnesota, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Bringing fast, reliable, secure AT&T 5G to more Americans

AT&T is unlocking the power of 5G for consumers, businesses and first responders through both AT&T 5G and AT&T 5G+:

- **AT&T 5G**, delivered over sub-6 spectrum sets us up to offer a better wireless experience with greater capacity to enable faster responses on capable devices. AT&T offers fast, reliable and secure 5G to 240 million people in 14,000 cities and towns nationwide, including Bemidji, Brainerd, Duluth, Mankato, Minneapolis, Rochester, St. Cloud, St. Paul, Virginia and Worthington in Minnesota.
- **AT&T 5G+** is our name for 5G delivered over a millimeter wave spectrum. Its super-fast speeds make it ideal for high-traffic areas and places like stadiums, arenas, school campuses, hospitals and will help unlock unprecedented experiences in iconic destinations and key venues. AT&T 5G+ is currently available in parts of 38 cities and more than 20 venues across the country like U.S. Bank Stadium in Minneapolis.

FirstNet: Dedicated to America's First Responders

We are committed to improving public safety infrastructure. As a part of that commitment, we have invested and built FirstNet in public-private partnership with the First Responder Network Authority (FirstNet Authority) – an independent agency within the federal government. FirstNet is the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community.

- **Expanding to serve:** FirstNet focuses on where first responders need connectivity. We've moved quickly to deliver more coverage, boost capacity and drive new capabilities for first responders. Using all AT&T LTE commercial spectrum as well as high-quality Band 14 spectrum, FirstNet covers **2.71 million square miles nationwide**. And we're actively extending the reach of FirstNet in Minnesota to give agencies large and small the reliable, unthrottled connectivity and modern communications tools they require.
- **First responder-centric 5G:** FirstNet subscribers in parts of 38 cities and more than 20 venues now have access to AT&T 5G+. Our [approach to 5G](#) for public safety is unlike anything else. We've upgraded the dedicated FirstNet network core to enable 5G connectivity that is being built to intuitively optimize the experience for America's first responders. First responders maintain voice communications with *always-on* priority and preemption on LTE, while the FirstNet network determines the best route for data traffic with compatible devices, whether that's 5G+ or LTE spectrum.

The FirstNet network is providing Minnesota public safety with truly dedicated coverage and capacity when they need. These advanced capabilities enable FirstNet to help fire, EMS, and law enforcement personnel save lives and protect their communities.

FirstNet and the FirstNet logo are registered trademarks and service marks of the First Responder Network Authority. All other marks are the property of their respective owners.

¹ GWS awarded AT&T Best Network OneScore 2020. GWS conducts drive tests for AT&T and uses the data in its OneScore analysis.
