

News Release

AT&T Invests More than \$120 Million Over Three-Year Period to Connect Local Customers in New Hampshire

Concord, NH, June 9, 2021- AT&T* is proud to connect customers across the country by continuing to grow the nation's best network¹. From 2018-2020, we expanded coverage and improved connectivity in more communities by investing more than \$120 million in our wireless network in New Hampshire.

AT&T's commitment to communities across the country continues and spans all layers of our network—from fiber to 5G to FirstNet®. These investments are essential to connecting our customers with their family, friends and colleagues by increasing the network's speed, reliability, coverage and overall performance.

We recently announced that AT&T will invest \$2 billion over the next 3 years to help address the digital divide nationwide. AT&T further improved critical communications for New Hampshire's first responders and improved public safety with FirstNet® – America's public safety network.

AT&T recently completed enhancements to more than 200 existing cell sites across New Hampshire, which will expand network coverage and capacity to many areas of the state. These sites provide coverage with AT&T LTE spectrum, as well as FirstNet Band 14 spectrum. Band 14 is high quality spectrum set aside by the federal government specifically for FirstNet.

“From connecting family and loved ones to helping first responders during a crisis, AT&T is committed to investing in New Hampshire to build state-of-the-art infrastructure that will keep people connected,” said Owen Smith, President, AT&T New Hampshire. “By continuing to improve our network at the state and local levels, we are helping businesses grow in New Hampshire and ensuring strong connections for our customers and communities.”

More details about our wireless coverage in New Hampshire, and anywhere in the U.S., can be found on the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).

Bringing fast, reliable, secure AT&T 5G to more Americans

AT&T is unlocking the power of 5G for consumers, businesses and first responders through both AT&T 5G and AT&T 5G+:

AT&T 5G, delivered over sub-6 spectrum sets us up to offer a better wireless experience with greater capacity to enable faster responses on capable devices. AT&T offers fast, reliable and secure 5G to 240 million people in 14,000 cities and towns nationwide including Portsmouth.

AT&T 5G+ is our name for 5G delivered over a millimeter wave spectrum. Its super-fast speeds make it ideal for high-traffic areas and places like stadiums, arenas, school

campuses, hospitals and will help unlock unprecedented experiences in iconic destinations and key venues. AT&T 5G+ is currently available in parts of 38 cities and more than 20 venues across the country.

FirstNet: Dedicated to America's First Responders

We are committed to improving public safety infrastructure. As a part of that commitment, we have invested and built FirstNet in public-private partnership with the First Responder Network Authority (FirstNet Authority) – an independent agency within the federal government. FirstNet is the *only* nationwide, high-speed broadband communications platform dedicated to and purpose-built for America's first responders and the extended public safety community.

- **Expanding to serve:** FirstNet focuses on where first responders need connectivity. We've moved quickly to deliver more coverage, boost capacity and drive new capabilities for first responders. Using all AT&T LTE commercial spectrum as well as high-quality Band 14 spectrum, FirstNet covers **2.71 million square miles nationwide**. And we're actively extending the reach of FirstNet in New Hampshire to give agencies large and small the reliable, unthrottled connectivity and modern communications tools they require.
- **First responder-centric 5G:** FirstNet subscribers in parts of 38 cities and more than 20 venues now have access to AT&T 5G+. Our [approach to 5G](#) for public safety is unlike anything else. We've upgraded the dedicated FirstNet network core to enable 5G connectivity that is being built to intuitively optimize the experience for America's first responders. First responders maintain voice communications with *always-on* priority and preemption on LTE, while the FirstNet network determines the best route for data traffic with compatible devices, whether that's 5G+ or LTE spectrum.

The FirstNet network is providing New Hampshire public safety with truly dedicated coverage and capacity when they need. These advanced capabilities enable FirstNet to help fire, EMS, and law enforcement personnel save lives and protect their communities.

FirstNet's Band 14 spectrum has been built out in more than 120 municipalities across New Hampshire, including in Portsmouth, the Manchester-Nashua area, and towns in Carroll County and Coos County to name a few.

Our commitment to New Hampshire

In addition to the programs mentioned above, AT&T's commitment to New Hampshire extends into the community:

- Over the past three years, AT&T New Hampshire and the AT&T Foundation have provided \$178,000 in community support to organizations across the state of New Hampshire in order to support a variety of initiatives like education, hunger relief and more.
- AT&T is a strong supporter of **New Hampshire Jobs for America's Grads** to help students who face barriers to education, and the **North Country Charter Academy** to provide

resources to rural high school students.

- **The New Hampshire Food Bank** has received more than \$30,000 in recent years from AT&T. In addition, in 2020 we donated 300 reusable bags to support hunger relief efforts during the COVID-19 crisis.

FirstNet and the FirstNet logo are registered trademarks and service marks of the First Responder Network Authority. All other marks are the property of their respective owners.

¹ GWS awarded AT&T Best Network OneScore 2020. GWS conducts drive tests for AT&T and uses the data in its OneScore analysis.
