AT&T Invests More Than \$350 Million Over 3-Year Period to Enhance Local Networks in Minnesota

Minneapolis, May 16, 2016 — At [AT&T](#)¹, we've invested more than \$350 million in our Minnesota wireless and wired networks during 2013-2015. These investments have given AT&T the most wireless coverage in Minnesota. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses. They also enhance critical services that support public safety and first responders.

In 2015, AT&T made 419 wireless network upgrades in Minnesota. This includes new cell sites, the addition of network capacity and network upgrades, and the addition of HD Voice calling to our entire LTE network.

"We're committed to providing our customers fast, reliable, highly secure connectivity. We want them to be able access the Internet at any moment, from almost any device and anywhere in the state," said Paul Weirtz, president of AT&T Minnesota. "Our continued investment in Minnesota, from the Twin Cities to the Iron Range to all parts of greater Minnesota, brings a host of new, innovative opportunities for residents and businesses."

A notable state network enhancement in 2015 included a large upgrade to our Distributed Antennae System (DAS) at TCF Bank Stadium at the University of Minnesota. The stadium DAS now has 70% more dedicated antennas (from what we launched in 2014), and the addition of a third layer of capacity. AT&T's stadium network can now handle more traffic, more quickly, and more efficiently.

In 2016, for the second year in a row, FORTUNE magazine recognized AT&T as the Most Admired Telecommunications Company in the world. We also placed #48 among the Top 50 World's Most Admired companies. This is our third year in a row on the Top 50 list – AT&T is the only communications company on the list. We ranked #1 in all 9 attributes. This included innovation, financial soundness and quality of products/services. FORTUNE's Most Admired Companies lists are among the most highly respected indicators of corporate performance and reputation.

We have big plans for 2016. We'll be giving you the ability to access and stream [DIRECTV](#) video services over a wired or wireless Internet connection from any provider and from virtually any device – smartphone, tablet, Smart TV, streaming media hardware or PC. We plan for each service to come with a set number of simultaneous sessions. These services will not require annual contracts, satellite dishes or set-top boxes.

We have an extensive Wi-Fi network with more than 40,000 AT&T Wi-Fi Hot Spots at popular restaurants, hotels, bookstores and retailers. We provide access to Wi-Fi at more than 1 million Hot Spots around the world. Most AT&T smartphone and home Internet customers get access to our entire national Wi-Fi network at no additional cost. Wi-Fi usage doesn't count towards customers' monthly wireless data plans.²
