AT&T Invests Nearly \$1.85 Billion Over 3-Year Period to Enhance Local Networks in Missouri

St. Louis, May 12, 2016— At AT&T¹, we've invested nearly \$1.85 billion in our Missouri wireless and wired networks during 2013 -2015. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses. They also enhance critical services that support public safety and first responders.

In 2015, AT&T made more than 600 wireless network upgrades in Missouri. We added new cell sites, additional network capacity, and new wireless high-speed Internet connections. During 2015, we also launched AT&T GigaPower, which offers up to 1Gbps Internet speeds over our fiber-based network, in 7 Missouri communities. We also continued a significant expansion of access to AT&T's business fiber network, which is now available at more than 28,000 customer locations across the state.

"Our investments in smart networks are enabling the innovation of today and tomorrow that will enhance economic growth and stimulate jobs," said John Sondag, president, AT&T Missouri. "Thanks to the leaders of our state, Missouri continues to be a good place to invest, both for our company, as well as other businesses of all sizes."

"Investment in Missouri's technology infrastructure is critical to keeping Missouri competitive and providing our residents and businesses with the best technology," said Dan Mehan, president, Missouri Chamber of Commerce. "AT&T's investment is good for jobs, helps give Missourians the tools they need to succeed in the tech economy and helps provide more opportunities for our state."

Notable Missouri network enhancements in 2015 included:

- Launching AT&T GigaPower in parts of 7 Missouri communities, including Kansas City, Independence, Belton, Grain Valley, Lee's Summit and Raymore.
- Expanding AT&T business fiber, which since 2012 has added more than 28,000 business locations in Missouri. Business fiber is now available in and around Kansas City, St. Louis, Cape Girardeau, Jefferson City, Joplin, Kingdom City, Sikeston, Springfield and St. Joseph.
- Launching HD Voice throughout the state, enabling clearer voice calls and simultaneous voice and data at 4G LTE speeds.

- Making more than 600 wireless carrier additions, adding capacity to cell sites that allow for more wireless traffic.
- Building several new cell sites.

The AT&T LTE network covers 365 million people in North America. In 2015, we added several markets in Missouri to the extensive AT&T LTE network, including: Trenton, Fulton and Moberly.

In 2016, for the second year in a row, FORTUNE magazine recognized AT&T as the Most Admired Telecommunications Company in the world. We also placed #48 among the Top 50 World's Most Admired companies. This is our third year in a row on the Top 50 list – AT&T is the only communications company on the list. We ranked #1 in all 9 attributes. This included innovation, financial soundness and quality of products/services. FORTUNE's Most Admired Companies lists are among the most highly respected indicators of corporate performance and reputation.

We offer Internet customers a great combination of speed and price. Additionally, AT&T high-speed Internet² customers have access to our entire national AT&T Wi-Fi Hot Spot Network at no additional charge³. We also offer our award-winning DIRECTV[®] service to eligible locations. Customers may be eligible for AT&T U-verse TV service, a 100% digital service available over our advanced network. In 2015, Woman's Choice Awards[®] named AT&T U-verse TV "America's Most Recommended Brand among women for Broadband, Television and Phone Service."

AT&T GigaPower offers our fastest Internet speeds, up to 1Gbps⁴ over a 100% fiber network to more than 1.5 million locations across 20 major metro areas. We've announced plans to expand the availability of Internet speeds up to 1Gbps to homes, apartments and small businesses in parts of 36 additional cities across the U.S. – which will total at least 56 metros served.

We plan to continue to roll out our fastest Internet services over a 100% fiber network to reach more than 14 million additional residential and commercial locations.

We have big plans for 2016. We'll be giving you the ability to access and stream [DIRECTV](#) video services over a wired or wireless Internet connection from any provider and from virtually any device – smartphone, tablet, Smart TV, streaming media hardware or PC. We plan for each service to come with a set number of simultaneous sessions. These services will not require annual contracts, satellite dishes or set-top boxes.

We have an extensive Wi-Fi network with more than 40,000 AT&T Wi-Fi Hot Spots at popular restaurants, hotels, bookstores and retailers. We provide access to Wi-Fi at more

than 1 million Hot Spots around the world. Most AT&T smartphone and home Internet customers get access to our entire national Wi-Fi network at no additional cost. Wi-Fi usage doesn't count towards customers' monthly wireless data plans.⁵
