AT&T Invests Nearly \$175 Million Over 3-Year Period to Enhance Local Networks in New Mexico

ALBUQUERQUE, N.M., May 11, 2016 — At [AT&T](#)¹, we've invested nearly \$175 million in our New Mexico wireless and wired networks during 2013-2015. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses. They also enhance critical services that support public safety and first responders.

In 2015, AT&T made more than 100 wireless network upgrades in New Mexico, including new cell sites, LTE upgrades and the addition of network capacity.

"We're committed to providing our customers fast, reliable, highly secure connectivity. We want them to be able to access the Internet at any moment, from almost any device and from anywhere," said Jerry Fuentes, president of Arizona and New Mexico, AT&T. "Our continued investment in New Mexico brings a host of new, innovative opportunities for residents and businesses."

The AT&T LTE network covers 365 million people in North America. Notable New Mexico network enhancements in 2015 included launching LTE in the Santa Fe area and bringing in a cell on wheels (COW) to handle the crowds at the Albuquerque International Balloon Fiesta.

In 2016, for the second year in a row, FORTUNE magazine recognized AT&T as the Most Admired Telecommunications Company in the world. We also placed #48 among the Top 50 World's Most Admired companies. This is our third year in a row on the Top 50 list – AT&T is the only communications company on the list. We ranked #1 in all 9 attributes. This included innovation, financial soundness and quality of products/services. FORTUNE's Most Admired Companies lists are among the most highly respected indicators of corporate performance and reputation.

We have big plans for 2016. We'll be giving you the ability to access and stream [DIRECTV](#) video services over a wired or wireless Internet connection from any provider and from virtually any device – smartphone, tablet, Smart TV, streaming media hardware or PC. We plan for each service to come with a set number of simultaneous sessions. These services will not require annual contracts, satellite dishes or set-top boxes.

We have an extensive Wi-Fi network with more than 40,000 AT&T Wi-Fi Hot Spots at popular restaurants, hotels, bookstores and retailers. We provide access to Wi-Fi at more

than 1 million Hot Spots around the world. Most AT&T smartphone and home Internet customers get access to our entire national Wi-Fi network at no additional cost. Wi-Fi usage doesn't count towards customers' monthly wireless data plans.²
