AT&T Invests Nearly \$325 Million over 3-Year Period to Enhance Local Network in Oregon

SALEM, Oregon, May 10, 2016 — At [AT&T](#)¹, we've invested nearly \$325 million in our Oregon wireless network during 2013-2015. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses. They also enhance critical services that support public safety and first responders.

In 2015, AT&T made 18 wireless network upgrades in Oregon, including new cell sites, wireless broadband upgrades, and network capacity.

"We're committed to providing our customers fast, reliable, highly secure connectivity. We want them to be able access the Internet at any moment, from almost any device and anywhere," said George Granger, President, AT&T Oregon. "Our continued investment in Oregon brings a host of new, innovative opportunities for residents and businesses."

The AT&T LTE network covers 365 million people in North America. In 2015, we added several markets in Oregon to the extensive AT&T LTE network, including:

- Expanding High Definition (HD) Voice in Oregon. Voice Over LTE (VoLTE) is the all-Internet Protocol (IP) network technology that enables HD Voice from AT&T, and VoLTE also enables the ability to talk while surfing the Web on the nation's most reliable 4G LTE network.
- Adding Burns, Pendleton and Riley to AT&T extensive LTE network. AT&T'S LTE network covers 355 million in North America.

In 2016, for the second year in a row, FORTUNE magazine recognized AT&T as the Most Admired Telecommunications Company in the world. We also placed #48 among the Top 50 World's Most Admired companies. This is our third year in a row on the Top 50 list – AT&T is the only communications company on the list. We ranked #1 in all 9 attributes. This included innovation, financial soundness and quality of products/services. FORTUNE's Most Admired Companies lists are among the most highly respected indicators of corporate performance and reputation.

We plan to continue to roll out our fastest Internet services over a 100% fiber network to reach more than 14 million additional residential and commercial locations.

We have big plans for 2016. We'll be giving you the ability to access and stream [DIRECTV](#) video services over a wired or wireless Internet connection from any provider and from virtually any device – smartphone, tablet, Smart TV, streaming media hardware or PC. We plan for each service to come with a set number of simultaneous sessions. These services will not require annual contracts, satellite dishes or set-top boxes.

We have an extensive Wi-Fi network with more than 40,000 AT&T Wi-Fi Hot Spots at popular restaurants, hotels, bookstores and retailers. We provide access to Wi-Fi at more than 1 million Hot Spots around the world. Most AT&T smartphone and home Internet customers get access to our

entire national Wi-Fi network at no additional cost. Wi-Fi usage doesn't count towards customers' monthly wireless data plans.²
