

## News Release

### **AT&T Invests More Than \$2.8 Billion Over 3-Year Period to Enhance Local Networks in Florida**

*Investment drives faster, more reliable connectivity and paves way for 5G mobile services*

TALLAHASSEE, Fla., May 4, 2017— At [AT&T](#)<sup>1</sup>, we've invested more than \$2.8 billion in our Florida wireless and wired networks during 2014-2016. These investments drive a wide range of upgrades to reliability, coverage, speed and overall performance for residents and businesses. They also improve critical services that support public safety and first responders.

In 2016, AT&T made 3,570 wireless network upgrades in Florida. The upgrades include 18 new cell sites, installation of new distributed antenna systems and additional network capacity to existing cell towers.

"AT&T is investing to provide faster, more reliable, highly secure connectivity for Floridians. These continued investments bring residents and businesses a host of new opportunities and help pave the path for 5G mobile services in the years ahead," said Joe York president of AT&T Florida.

"For Florida to continue to thrive and serve residents, it's crucial we have companies invest through thoughtful innovation," said state Senator Travis Hutson. "By investing in our state, AT&T is making business growth possible and is providing the most up to date technology for our first responders through technology like Next Generation 9-1-1 while keeping our residents connected and entertained."

"The Advanced Wireless Infrastructure Deployment Act provides a state-wide uniform approach to the efficient deployment of wireless technology" said state Representative Mike La Rosa. "This legislation reduces unnecessary roadblocks that increase expenses associated with wireless deployment and will help speed up the availability of 5G technology."

The AT&T LTE network covers nearly 400 million people in North America. Notable Florida network enhancements in 2016 include:

- Upgrading the Tampa area network in preparation for the College Football Playoff National Championship, including 8 distributed antenna systems throughout the Tampa Bay area.
- Activating a new outdoor distributed antenna system at the Hard Rock Stadium in Miami.

- Deploying mobile cell sites, or Cells on Wheels (COWs) to bolster service at several crowd-drawing events.

The First Responder Network Authority (FirstNet) recently chose AT&T to build a nationwide public safety broadband network. The network will be dedicated to America's police, firefighters, EMS personnel and other first responders when they need it. Should Florida opt-in to the FirstNet network, we will build upon our current and planned investments with a dedicated focus on the state's first responders.

And we would expect to make a significant investment to upgrade and maintain Florida's FirstNet network over the next 25 years, bringing your first responders the coverage, value and experience they expect.

For the third year in a row, FORTUNE magazine recognized AT&T as the Most Admired Telecommunications Company in the world in 2017. We also No. 37 among the Top 50 World's Most Admired companies.

AT&T is the only telecommunications company on the list. We ranked No. 1 in all 9 attributes. This included innovation, financial soundness and quality of products/services.

We have the largest fiber network within our 21-state wireline footprint.<sup>2</sup> We also now market a 1 gigabit connection<sup>3</sup> on our 100% fiber network to 4.6 million locations across 52 major metro areas. We plan to reach at least 75 major metros overall. We expect to add 2 million locations in 2017, and we plan to reach at least 12.5 million locations by mid-2019.

We continue to expand the scope of our ultra-fast internet powered by [AT&T Fiber](#).

We have an extensive Wi-Fi network with more than 40,000 AT&T Wi-Fi hotspots at popular restaurants, hotels, bookstores and retailers. And we provide access to Wi-Fi at more than 1 million locations around the world. Most AT&T smartphone and home internet customers get access to the entire national AT&T Wi-Fi Hot Spot network.<sup>4</sup> at no additional cost. Wi-Fi usage doesn't count against customers' monthly wireless data plans.
