AT&T Invests More Than \$400 Million Over 3-Year Period to Boost Local Networks in Denver Metro Area

DENVER, JULY 1, 2019 — At [AT&T](#)¹, we've invested more than \$400 million in our Denver metro wireless networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've also improved critical services that support Public Safety and first responders using the FirstNet communications platform.

This investment has helped AT&T become the fastest LTE wireless network in Denver, Boulder, Aurora and the nation, according to the first quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®.²

In 2018, AT&T made 385 wireless network upgrades in the greater Denver metro area. We added new cell sites, boosted network capacity and deployed new antenna systems at public venues.

"We're always looking for new opportunities to enhance coverage for our customers and FirstNet subscribers," said Roberta Robinette, president, AT&T-Colorado. "And our investment in Denver is another example of how AT&T is investing in local communities to help keep customers connected when and where they need it most."

This investment also supports expanding 5G Evolution and LTE-LAA technologies in Denver, which we launched last year. These technologies serve as a step in the path to 5G by boosting the existing LTE network and priming it for the future of connectivity.

The AT&T LTE network covers more than 400 million people in North America. Notable Denver network enhancements in 2018 included:

- Boosted coverage for customers at a new convention and hotel resort near the Denver airport by deploying an antenna system;
- Upgraded antenna systems at several stadiums including where Colorado's pro-baseball team plays;
- Built new cell sites including one near local botanic gardens and 6th Ave & Sable;

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

Transforming Public Safety Communications

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban, or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first responders connect to the critical information they need – every day and in every emergency.

Building upon our current and planned investments in Denver, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Denver first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network in the nation, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.³
- Public safety agencies subscribed to FirstNet have 24/7 [access](#) to a nationwide fleet of 75 deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.
