

## News Release

### **AT&T Invests More Than \$175 Million Over 3-Year Period to Boost Local Networks in Utah**

SALT LAKE CITY, JULY 1, 2019 — At [AT&T](#)<sup>1</sup>, we've invested more than \$175 million in our Utah wireless networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've also improved critical services that support public safety services and first responders using the FirstNet communications platform.

AT&T's wireless network covers more than 99% of all Americans and has become the fastest wireless network in the nation, according to the first quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®.<sup>2</sup>

In 2018, AT&T made 443 wireless network upgrades in Utah. Notable Utah network enhancements in 2018 included:

- Boosted coverage for customers by deploying antenna systems at several major hospitals, the largest outdoor stadium in Utah, and Salt Lake's premier shopping destination in the heart of downtown;
- Added capacity for customers in Park City prior to an international film festival;
- Added new cell site between Farmington and Layton.

By building out our 4G LTE network, we're boosting network speeds and capacity, as we continue to expand network availability of our network and upgrading our technology.

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

#### **Transforming Public Safety Communications**

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first responders connect to the critical information they need – every day and in every emergency.

Building upon our current and planned investments in Utah, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Utah first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network in the nation, thanks to the specialized capabilities enabled

by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.<sup>3</sup>

- Public safety agencies subscribed to FirstNet have 24/7 [access](#) to a nationwide fleet of 75 deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.
