

News Release

AT&T Invests Nearly \$425 Million Over 3-Year Period to Boost Local Networks in Orlando

ORLANDO, Fla., June 17, 2019. — At [AT&T](#)¹, we've invested nearly \$425 million in our Orlando area wireless and wired networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've also improved critical services that support Public Safety and first responders using the FirstNet communications platform.

This investment has helped AT&T become the fastest wireless network in the nation, according to the first quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®.²

In 2018, AT&T made nearly 400 wireless network upgrades in Orange, Seminole, Osceola and Lake counties. Some of the notable local network enhancements included:

- Adding more capacity and bandwidth to hundreds of cell sites to increase speed and boost performance
- Turning on 7 new cell sites
- Activating 12 new Distributed Antenna Systems (DAS), including at a major theme park and a college football stadium
- Expanding 9 existing DAS

"We're always looking for new opportunities to enhance coverage for our customers and FirstNet subscribers," said Dan Pollock, regional director, AT&T Florida. "This investment will help keep customers connected when and where they need it most. It will also pave the path to 5G mobile services in the years ahead."

AT&T launched [mobile 5G](#) in parts of [Orlando](#) in April of this year. Our investment also supports our plans to expand 5G Evolution and LTE-LAA. These technologies serve as a step in the path to 5G by boosting the existing LTE network and priming it for the future of connectivity.

The AT&T LTE network covers more than 400 million people in North America. By building out our 4G LTE network, we're boosting network speeds and capacity, as we continue to expand the availability of our network and upgrade our technology.

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

Transforming Public Safety Communications

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban, or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first responders connect to the critical information they need – every day and in every emergency.

Building upon our current and planned investments in the Orlando area, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Deployed Band 14 spectrum in more than 600 markets nationwide, including the Orlando area. Band 14 is high-quality spectrum provided by the First Responder Network Authority. Its signal covers larger geographic areas with less infrastructure to better support rural communities, and it can better reach in-building in more urban areas as compared to higher-MHz spectrum.
- Local first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network in the nation, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.³
- Public safety agencies subscribed to FirstNet have 24/7 [access](#) to a nationwide fleet of 75 deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.

Our internet offerings

We now market a 1 gigabit connection⁴ on our 100% fiber network to more than 12 million locations across 85 major metro areas nationwide. In the Orlando, Daytona Beach and Melbourne areas, we market our internet service powered by AT&T Fiber to more than 200,000 customer locations.

We plan to reach about 14 million locations across at least 85 metro areas by mid-2019 for consumers.

We are the largest U.S.-based provider of fiber for business services. There are over 500,000 U.S. business buildings lit with AT&T fiber, and we're adding thousands more each month.

Within those buildings, AT&T now enables high-speed fiber connections to over 2.2 million U.S. business customer locations. And if you count businesses near our fiber network, that

number quadruples. Nationwide, more than 8 million business customer locations are on or within 1,000 feet of our fiber.⁵

To learn more about our wireless coverage in Orlando or anywhere in the U.S., go to the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please go to the [AT&T network news page](#).
