

News Release

AT&T Invests More Than \$3.4 Billion Over 3-Year Period to Boost Local Networks in Dallas-Fort Worth-Arlington

DALLAS, Texas, JUNE 24, 2019 — At [AT&T](#)¹, we've invested more than \$3.4 billion in our Dallas-Fort Worth-Arlington wireless and wired networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've also improved critical services that support Public Safety and first responders using the FirstNet communications platform.

AT&T's wireless network covers more than 99% of all Americans and has become the fastest wireless network in the nation, according to the first quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®. ²

In 2018, AT&T made 1,832 wireless network upgrades in the Dallas-Fort Worth-Arlington area.

“By investing more than \$3.4 billion in the Dallas-Fort Worth-Arlington area, we are helping to bolster connectivity, speeds and coverage in this dynamic and growing part of the state,” said Mike Peterson, AT&T vice president, external affairs. “The Metroplex is our home, and we're committed to providing our customers with outstanding service via industry-leading technology. Importantly, this significant investment is also allowing us to enhance the vital services that support first responders using the FirstNet communications platform, which is crucial to public safety. And we're excited about what this investment means for the roll out of mobile 5G in Dallas and the far-reaching enhancements that it will continue to bring to our area.”

This investment also supports our introduction of [mobile 5G](#) in parts of Dallas.

The AT&T LTE network covers more than 400 million people in North America. Notable Dallas-Fort Worth-Arlington network enhancements in 2018 included:

- New site builds
- Small cells
- LTE carrier additions
- LTE bandwidth expansions
- RF modifications (antenna changeouts)
- SIAD upgrades (allows for enhanced transport backhaul)

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

Transforming Public Safety Communications

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban, or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first responders connect to the critical information they need – every day and in every emergency.

Building upon our current and planned investments in Dallas, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Deployed Band 14 spectrum in more than 600 markets nationwide, including Dallas. Band 14 is high-quality spectrum provided by the First Responder Network Authority. Its signal covers larger geographic areas with less infrastructure to better support rural communities, and it can better reach in-building in more urban areas as compared to higher-MHz spectrum.
- Dallas first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network in the nation, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.³
- Public safety agencies subscribed to FirstNet have 24/7 [access](#) to a nationwide fleet of 75 deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.

Our internet offerings

We now market a 1 gigabit connection⁴ on our 100% fiber network to more than 12 million locations across 85 major metro areas nationwide. In the Dallas-Fort Worth-Arlington area, we market our internet service powered by AT&T FiberSM to nearly 970,000 customer locations.

We plan to reach about million locations across at least 85 metro areas by mid-2019 for consumers.

We are the largest U.S.-based provider of fiber for business services. There are over 500,000 U.S. business buildings lit with AT&T FiberSM, and we're adding thousands more each month.

Within those buildings, AT&T now enables high-speed fiber connections to over 2.2 million U.S. business customer locations. And if you count businesses near our fiber network, that number quadruples. Nationwide, more than 8 million business customer locations are on or within 1,000 feet of our fiber.⁵
