

## News Release

### **AT&T Invests More than \$800 Million Over 3-Year Period To Boost Local Networks in Oklahoma**

OKLAHOMA CITY, OK, December 12, 2019 — At [AT&T](#)<sup>1</sup>, we've invested more than \$800 million in our Oklahoma wireless and wired networks during 2016-2018. These investments boost reliability, coverage, speed and overall performance for residents and businesses. We've improved critical services that support Public Safety and first responders using the FirstNet communications platform.

AT&T's wireless network covers more than 99% of all Americans and has become the fastest wireless network in the nation, according to the second quarter 2019 results from tests taken with Speedtest® and analyzed by Ookla®. <sup>2</sup>

In 2018, AT&T made more than 939 wireless network upgrades in Oklahoma, including new cell sites and additional network capacity.

"Our investments in Oklahoma enhance coverage for our customers and FirstNet subscribers," said Steve Hahn, president of AT&T Oklahoma. "We are dedicated to the communities we serve, and our ongoing investments help to keep Oklahomans connected when and where they need it most."

"AT&T's ongoing investment in Oklahoma's communications infrastructure is essential for all aspects of our state's economy. Small businesses, our schools and our healthcare systems – and the Oklahomans they serve – all benefit from the expanded and advanced networks they are building," said Oklahoma Governor Kevin Stitt.

By building out our 4G LTE network, we're boosting network speeds and capacity, as we continue to expand the availability of our network and upgrade our technology.

Additionally, for the 5th consecutive year we've landed on *Fortune* magazine's list of the "World's Most Admired" companies. It's also the 6th year in a row we've appeared on the Global Top 50 list – no other telecom company made the Top 50.

#### **Transforming Public Safety Communications**

FirstNet is Public Safety's dedicated, nationwide communications platform. It is for all first responders – career and volunteer, urban or rural. It's bringing public safety communications into the 21st century with new, innovative capabilities, helping first responders connect to the critical information they need – every day and in every emergency.

FirstNet is built with AT&T in a public-private partnership with the [First Responder Network Authority](#) – an independent agency within the federal government. This helps ensure that the FirstNet communications platform and service offerings meet the short- and long-term needs of the public safety community.

Building upon our current and planned investments in Oklahoma, we continue to extend the reach and increase the capacity of the FirstNet communications platform:

- Deployed Band 14 spectrum in more than 600 markets nationwide, including multiple locations in Oklahoma, including Oklahoma City, Tulsa, Norman, Edmond, Muskogee, Stillwater, Tahlequah, Claremore, Yukon, Ada, Ardmore, Enid, Lawton, Durant, Guthrie, Seminole, Ponca City, McAlester, Weatherford, El Reno, Grove, Eufaula, Elk City, Chickasha, Shawnee and many other communities. Band 14 is high-quality spectrum: its signal covers larger geographic areas with less infrastructure to better support rural communities, and it can better reach in-building in more urban areas as compared to higher-MHz spectrum.

- Oklahoma first responders enjoy the fastest overall experience on FirstNet, compared to any commercial network, thanks to the specialized capabilities enabled by the physically separate and dedicated FirstNet network core, like always-on priority and preemption.<sup>3</sup>

- Public safety agencies subscribed to FirstNet have 24/7 access to a nationwide fleet of 72 dedicated deployable network assets. These assets can either be deployed for planned events or called upon in emergencies to help first responders stay connected and operate faster, safer and more effectively when lives are on the line.

### **Our commitment to rural America**

Through our participation in the FCC's Connect America Fund universal service program, AT&T has been helping to meet the connectivity needs of customers in largely rural areas and to expand the opportunities enabled by internet access. By the end of 2020, AT&T will have used funds from this FCC program to help deploy, maintain and offer internet access and voice services to more than 1.1 million mostly rural homes and small business locations in FCC-identified areas. By the end of 2018, we offered high-speed internet access to more than 190,000 locations across Oklahoma.

We are the largest U.S.-based provider of fiber for business services. There are over 500,000 U.S. business buildings lit with AT&T fiber, and we're adding thousands more each month.

Within those buildings, AT&T now enables high-speed fiber connections to over 2.2 million U.S. business customer locations. And if you count businesses near our fiber network, that

number quadruples. Nationwide, more than 8 million business customer locations are on or within 1,000 feet of our fiber.<sup>4</sup>

To learn more about our wireless coverage in Oklahoma, or anywhere in the U.S., visit the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please visit the [AT&T network news page](#).
