

## News Release

### **AT&T Invests Nearly \$1.5 Billion Over 3-Year Period to Boost Local Networks in Houston**

HOUSTON, Aug. 22, 2018 — At [AT&T](#)<sup>1</sup>, we've invested nearly \$1.5 billion in our Houston wireless and wired networks during 2015-2017. These investments boost reliability, coverage, speed and overall performance for residents and businesses. They also improve critical services that support public safety and first responders.

In 2017, AT&T made 446 wireless network upgrades in the Houston area that included boosting network capacity.

"Houston leadership clearly welcomes investment in the city's wireless communications infrastructure," said Stacy Canady, AT&T Regional Vice President, External and Legislative Affairs. "We are pleased to continue to work with Houston leaders to help ensure businesses and residents here have strong, secure connections and stand ready to harness the promise and power of the coming evolution in wireless communications."

These investments also support expanding 5G Evolution and LTE-LAA technologies in Houston, which we launched in July. These technologies serve as the runway to 5G by boosting the existing LTE network and priming it for the future of connectivity.

"Houston's strength rests in its people and in the employers, who live here, give here and invest here," said Mayor Sylvester Turner, City of Houston. "As the area continues to recover from Hurricane Harvey and looks to further strengthen our economy, it's critically important that we have state-of-the-art infrastructure to allow us to communicate, connect and compete. AT&T not only understands that critical need for our community, but it consistently steps up to ensure that the City of Houston has access to new technologies and high-speed connectivity that's key to our future growth."

The AT&T LTE network now covers more than 400 million people in North America. In 2017, AT&T made 217 LTE network upgrades in the Houston area.

By building out our 4G LTE network, we're laying the foundation for 5G, the next advance in network technologies. We're boosting network speeds and capacity, as we continue to expand the availability of our network using the latest technology.

Since the formation of the FirstNet public-private partnership a little over a year ago, governors from all 50 states, 5 territories and D.C. recognized the value of FirstNet, joining in its mission to strengthen and modernize public safety's communications capabilities.

FirstNet is a new nationwide communications platform dedicated to America's public safety community. As we build, deploy and evolve FirstNet, we will build upon our current and planned investments in Texas to help ensure public safety's network delivers the coverage and cutting-edge capabilities first responders expect – today and for decades to come.

For the 4<sup>th</sup> year in a row, AT&T earned the top spot in the telecommunications industry on FORTUNE's Most Admired Companies list in 2018. We also placed No. 49 among the 50 most admired companies across all industries.

We were ranked first or second in all 9 attributes used to compile the list, including innovation, people management, quality of management, long-term investment value, quality of products/services and global competitiveness.

### **Our internet offerings**

We continue to expand the scope of our ultra-fast internet powered by [AT&T Fiber](#). We now market our ultra-fast internet service powered by AT&T Fiber to more than 725,000 customer locations in the Houston area.

We have the largest fiber network within our 21-state wireline footprint.<sup>2</sup> And AT&T is the largest U.S.-based provider of fiber for business services, creating an unparalleled ability to serve businesses of all sizes.

We also now market a 1 gigabit connection<sup>3</sup> on our 100% fiber network to 9 million locations across 71 major metro areas nationwide. We plan to reach at least 14 million locations across at least 84 metro areas by mid-2019 for consumers.

To learn more about our coverage in Houston or anywhere in the U.S., go to the [AT&T Coverage Viewer](#). For updates on the AT&T wireless network, please go to the [AT&T network news page](#).

<sup>1</sup> AT&T products and services are provided or offered by subsidiaries and affiliates of AT&T Inc. under the AT&T brand and not by AT&T Inc.

<sup>2</sup> Based on publicly available data for the top fiber providers in the AT&T operating footprint.

<sup>3</sup> Actual customer speeds may vary. Download speeds are typically up to 940Mbps due to overhead capacity reserved to deliver the data.

### **Cautionary Language Concerning Forward-Looking Statements**

Information set forth in this news release contains financial estimates and other forward- looking statements that are subject to risks and uncertainties, and actual results may differ materially. A discussion of factors that may affect future results is contained in AT&T's filings with the Securities and Exchange Commission. AT&T disclaims any obligation to update or revise statements contained in this news release based on new information or otherwise.
