

News Release

AT&T Fiber Now Available via a 100% Fiber Network in Louisville

Ultra-Fast Internet Speeds Available to Homes, Apartments and Small Business Locations in Parts of Louisville Area

LOUISVILLE, KY, Oct. 18, 2016— AT&T¹ launched ultra-fast internet service in parts of the Louisville area.² We now offer eligible homes, apartments and small business locations in the area a 1 gigabit internet connection³ on our 100% fiber network under the AT&T FiberSM umbrella brand.

We've also made ultra-fast internet speeds available in parts of Louisville and surrounding communities. We plan to expand access to ultra-fast internet speeds in parts of Jeffersonville and New Albany, Ind. in the future.

The Louisville area is one of [67 metros](#) where we're making our fastest internet service available. We now market our ultra-fast service to over 3 million locations, of which over 500,000 include apartments and condo units. In the Louisville area, there are nearly 80 apartments and condo units on our 100% fiber network.

We're on track to exceed the 12.5 million locations planned by mid-2019.

"The announcement that AT&T's ultra-fast 100% fiber internet is coming to Louisville is exactly the type of investment that will keep Louisville at the forefront as we look to drive economic development and job creation here in the city," said Kent Oyler, President and CEO, Greater Louisville Inc.

"While businesses have had access to 100% fiber networks for some time here in Louisville, the expansion of these services that provide gigabit connectivity in residential areas is a game changer for Louisville," said State Sen. Perry Clark.

"I am excited by this announcement, which is yet another example of private industry responding to consumer demand," said State Rep. Jerry Miller.

"Residents and businesses alike benefit from high-speed connections, and the speeds that will be available through this 100% fiber network will position Louisville well as we continue to work to drive economic development and job creation in the River City," said Jeffersontown Mayor Bill Dieruf, president, Jefferson County League of Cities.

“AT&T is committed to extending access to ultra-fast internet in the Louisville area because our customers are increasingly interacting with their world in more data-intensive ways,” said Hood Harris, president, AT&T Kentucky. “A growing number of people are streaming content directly from their devices, and interacting with family and friends through live videos. For these reasons, we are proud to now offer our fastest internet speeds in Louisville and its surrounding communities.”

Internet-only pricing for customers who choose AT&T Internet 1000, our fastest speed tier on our 100% fiber network, starts as low as \$90 a month. Customers may be able to add one of our [award-winning DIRECTV](#) or U-verse TV services. We have single, double and triple play offers to fit each customer’s needs.

Internet customers on the 100% fiber network have access to the latest Wi-Fi technology. They can enjoy our best in-home Wi-Fi experience, faster Wi-Fi speeds, broad coverage and support for all of their devices.

What can I do with a service that starts with a 1 gig connection?

With internet speeds 20x faster than the average cable customer⁴, you can download 25 songs in 1 second or your favorite 90-minute HD movie in less than 34 seconds.⁵

You can also instantly access and stream the latest online movies, music and games. With these ultra-fast speeds, customers can seamlessly perform tasks like telecommuting, video-conferencing, uploading and downloading photos and videos, connect faster to the cloud and more.

What is AT&T Fiber?

The 100% fiber network under the AT&T Fiber umbrella brand gives customers the power to choose from a wide range of internet speeds over an ultra-fast internet connection. This network is just one of the network technologies we plan to use to connect customers as a part of AT&T Fiber.
