Transform Your Internet with All-Fi® Pro: AT&T's New Package with Equipment Upgrades, Extenders and Security Built In!

Supercharge your AT&T Fiber with this game-changing package built to level up the in-home experience

---

Key Takeaways:

- All-Fi® Pro supercharges AT&T Fiber with our new Wi-Fi 7 gateway and an upgrade program for future equipment to keep your home network up to date.[1]
- Expand the Wi-Fi coverage in your home with the price of extenders included (regularly $10/month).[2]
- Level up your protection with AT&T ActiveArmor℠ advanced internet security - now also part of All-Fi Pro (regularly $7/month).[3]

Having great high-speed internet means more than just getting a strong connection to your home – it's about the performance you experience within it. AT&T Fiber already delivers America's fastest internet with the most reliable speeds[4] to millions of doorsteps and **today we're introducing All-Fi® Pro - a game-changing package built to level up the in-home experience** for eligible customers.[5]

It starts with the latest technology. Just like you upgrade your smartphone, your home internet equipment deserves the same attention. **With All-Fi Pro, you'll get our new Wi-Fi 7 enabled gateway**. This gateway unlocks our fastest Wi-Fi speeds and better latency, so you get the most out of your home internet. And when it's time for an upgrade, we'll alert you.[1] This way, you can keep enjoying AT&T's best performance at home without missing a beat.

To help that powerful signal reach every corner of your home, **All-Fi Pro includes mesh Wi-Fi extenders**. Each extender **can boost Wi-Fi coverage by up to 1,000 square feet** to help eliminate dead zones.[2]

Because your security is a top priority – we're also leveling up your online protection with All-Fi Pro. With ActiveArmor advanced internet security included, you'll get more privacy and safety features like VPN at Home to mask your IP address from online snoops and third-party trackers[6], ID Monitoring that alerts you if your personal information is leaked[7] and more.

Building a whole-home internet solution on your own can add up and swapping equipment is often an afterthought, but All-Fi Pro is designed to take the hassle out of this process and make the most of your internet experience. Building on this simplicity, we've **added All-Fi Pro at no additional cost to AT&T Fiber multi-gig plans**. For customers who prefer 1-Gig or below, you can add All-Fi Pro to your plan with a subscription or purchase some features separately.

All-Fi Pro is yet another way we're setting AT&T Fiber apart when it comes to home internet. Just like the AT&T Guarantee is raising the bar across the industry, by delivering the connectivity customers can depend on, the deals they want, and the prompt, friendly service they deserve. All guaranteed or we make it right. Learn more at att.com/guarantee. To learn more about AT&T All Fi Pro head to att.com/allfipro.

[1] Must maintain All-Fi Pro, in good standing, for min of 12 mos. to be eligible, for equipment upgrade. Limited to one upgrade every 36 mos.
